SUPERIOR STYLE, FUNCTION AND QUALITY OF BUILD

Steel Sectional Garage Doors

Steel Sectional Garage Doors

SUPERIOR STYLE, FUNCTION AND QUALITY OF BUILD

A value-packed and practical choice in garage door. Dominator[®] Steel Sectional Garage Doors are available in a wide range of styles and colours to complement the exterior appearance of your home and will perform well over many, many years.

Dominator® Futura

The Dominator® Futura horizontal ribbed design, creates an extremely cost effective door. Its distinctive wood grain finish offers the look and feel of timber with all the advantages of high grade Zinc-based steel.

Available in a wide range of commonly used colours the Dominator® Futura may also be ordered in a smooth finish to further match current design trends and enhance the appearance of your home.

DOMINATOR® -the right choice

THINKING OF BUYING A NEW, OR REPLACING YOUR EXISTING GARAGE DOOR?

Buying a garage door doesn't have to be difficult, or scary. There are just a few steps involved, and there's always someone available to give you advice.

STEP 1 GET YOUR GARAGE READY FOR A MEASURE AND QUOTE

Unfortunately with a garage door, getting a quote over the phone is not the best way. We really need to visit your home and measure up your door opening. This is the only way to get an accurate quote.

STEP 2 ONCE YOU ARE READY, CALL US

There is a Dominator® Dealer in every main centre around the country. Simply phone the free 0800 number or visit the Dominator® website to locate your nearest one – the details are at the bottom of this page.

STEP 3 DO YOU KNOW WHAT STYLE OF DOOR YOU WANT?

Look through this brochure or visit our website to get an idea of the type of door you want. When we come round to measure, we can offer further advice and opinions on what will suit your needs.

STEP 4 DOUBLE CHECK ANY COMPARISON QUOTES

If you choose to get quotes from multiple dealers, and you notice a price difference between them, make sure you question them; to be sure you are comparing doors that not only look the same, but are of the same quality and thickness and come with the same level of service. After all you don't want to have to throw your garage door away after only a few years!

The Dominator® Estate has a deep horizontal ribbed design that creates an extremely strong and secure sectional door ideal for larger openings. Its designer wood grain finish offers the look and feel of timber with all the advantages of high grade Zinc-based steel.

Available in a wide range of commonly used colours the Dominator® Estate may also be ordered in a smooth finish to further match current design trends.

Dominator® Estate

The modern Dominator® Milano with its fine pencil-rib design, adds a stylish finish to your home. Its fashionable wood grain finish offers the look and feel of timber with all the benefits of high grade Zinc-based steel.

The Dominator® Milano may also be ordered in a smooth finish to further match current design trends and enhance the appearance of your home and is available in a wide range of commonly used colours.

Dominator® Milano

Dominator® Georgian

The elegant Georgian raised pattern design, adds a stylish finish to the door. Its distinctive wood grain finish offers the look and feel of timber with all the advantages of high grade Zinc-based steel.

Available in a wide range of commonly used colours the Dominator® Georgian may also be ordered in a smooth finish should your home's architecture suit it.

Dominator® Somerset

The wide raised pattern design of the Somerset, adds a greater horizontal dimension to your garage opening. Its distinctive wood grain finish offers the look and feel of timber with all the advantages of high grade Zinc-based steel.

Available in a wide range of commonly used colours the Dominator® Somerset may also be ordered in a smooth finish to should your home's architecture suit it.

The Dominator® Valero Flat Panel sectional door, will add a contemporary sleek look to your home. Its distinctive minimalistic design complements most modern architecture.

The Dominator® Valero is roll-formed from pre-painted steel in a smooth finish. Optionally, it can be accentuated with a wood grain texture embossing for further effect.

Dominator® Valero

The flat folded design of the Sierra, provides a clean look to any opening. Its distinctive minimal look and strong sharp lines are currently a favourite of modern architecture.

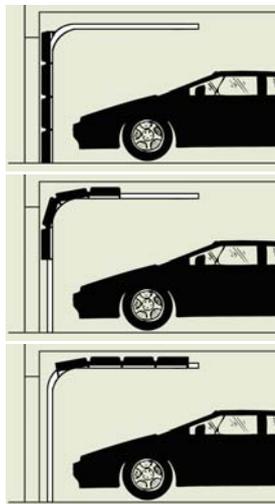

The superior flat folded design creates a truly flat finish that is solid and strong. The Sierra is the first choice for contemporary house designs that require larger garage openings.

Dominator® Sierra

Sectional Garage Doors

TOP APPEARANCE AND FUNCTION FOR NEW AND EXISTING HOMES

Maximise the visual appeal of your home with the stylish good looks of a Dominator® sectional garage door. You'll enjoy advantages like its smooth, quiet action and being able to park up to the door, inside and out, to maximise available space. Safety, security, convenience and satisfaction will flow from your decision to specify a Dominator® sectional garage door. Choose from a vast range to suit your home and lifestyle.

CUSTOM MANUFACTURE

Dominator® sectional doors are custom manufactured to a customer's specific opening dimensions. A perfect fit is assured with accuracy to within 1mm in height and width. Reinforcing struts, where required on larger doors, provide additional strength.

MAXIMUM USE OF SPACE

You can park right up to your sectional door without worry of damage to your vehicle when the door is operated, because the door doesn't protrude beyond the front of your garage. Inside, you can use most of the available headroom – an advantage for hatchbacks, roof racks and taller vehicles.

PERFECT BALANCE AND OPERATION

Carefully researched spring formulae and precision manufacture combine to provide a door that is perfectly in balance for easy, smooth operation, with minimal maintenance, for the life of the door.

LOW HEADROOM INSTALLATION

Installation of our sectional doors can be achieved in most low headroom garages with special hardware (complemented with garage door automation).

SAFETY AND SECURITY

A sectional door is always supported in its side tracks. This, and its vertical operation provide for greater safety. Your door won't unexpectedly blow open or shut, drop or swing. And it's virtually impossible to force open due to its tight fit, both in its tracks and at the bottom edge.

DUST AND WIND RESISTANT

The sectional door's trim fit also effectively seals out draughts, wind, dust, debris and rain. This is particularly important where you have internal access from the garage into your home or valuable items stored.

AUTOMATIC OPERATION

The push of a button from the comfort of your car is all it takes to open and close your garage door, a real plus in the chilly months of Winter. Dominator® garage doors are designed to work in harmony with the Dominator® range of openers.

INSTALLATION

Dominator® sectional doors are supplied, installed and serviced by any of our authorised Dominator® distributors nation-wide.

COMPUTER DESIGN

Dominator® sectional doors boast an intricate and unique computer controlled system in their manufacture which establishes correct panel and rib positioning in all styles.

This custom design feature ensures a perfectly balanced appearance to the finished door.

FINISH AND COLOUR CHOICE

You can choose from more than 20 pre-painted steel colours, or Zincolume®, in either smooth or woodgrain finish. Alternatively you may wish to choose a durable powder coat in a reduced gloss finish which is available in an almost infinite range of colours to achieve the look you desire. Samples of all types of finish are available from your Dominator® distributor.

Openers and Accessories

GOT THE RIGHT DOOR? DON'T GET THE WRONG OPENER

So you've chosen the right door for your home, don't get the wrong opener. Don't get left out in the cold with Dominator's GDO range of openers now featuring **TrioCode™** Technology.

WHAT IS TRIOCODE™?

TrioCode™ is a revolutionary new coding system that provides enhanced reliability and security by using three frequencies to overcome interference issues.

WHY DO I NEED IT?

Increasingly our environment is filled with wireless devices such as cordless headphones, wireless sound systems and more, many of which operate on the same frequencies as door and gate openers. Frustratingly, these devices can jam out your door or gate opener's receiver, and the offending device may not even be in your building, it could be over 200 metres away.

TrioCode™ overcomes this challenge by simultaneously transmitting on three different frequencies. Even if two frequencies are jammed, the **TrioCode™** transmitter will still operate your door. **TrioCode™** is your insurance that your garage door will continue to operate without interference for years to come, no matter what new technology is introduced to the surrounding region.

WINDOW STYLES

A wide range of window styles (shown below) can be incorporated into your choice of sectional garage door. These windows are supplied as an optional extra and are available in varying configurations of trim and colour. Your Dominator® distributor can advise on suitability and choice.

FOR OVER A DECADE DOMINATOR® INTERNATIONAL HAS PIONEERED A NEW STANDARD IN GARAGE DOOR SYSTEMS

That standard is proudly represented by this latest range of Dominator® Garage Doors and Automatic Door Openers. A range built on the premise of providing a product that is nothing less than the best, both in terms of quality and value. Our custom-built system, backed by continual research and development, using the best design skills, advanced technology and precision engineering have established Dominator® as one of the finest garage door systems available.

It is this level of dedication that has earned our company numerous awards for design, quality and export.

From our revolutionary Dominator® openers through to our vast and ever-increasing range of garage doors, Dominator® can provide the styling, security and reliable performance that you and every home owner needs.

Installation and Maintenance

Dominator® garage door systems are available from, and should be installed by, an authorised Dominator® dealer. They are the complete garage door professionals who provide a friendly and skilled measure, quote and installation service. They will be happy to advise you on the best product for your application and demonstrate the features of the Dominator® range, instore.

They also provide a complete after-sales service should you wish to upgrade your system with an opener, any of the accessory range or require repairs or parts.

Thank you for considering or choosing quality Dominator® products.

MAINTAINING YOUR INVESTMENT

Like your car, your new door will require a little care to maintain its appearance. It is recommended that the outside of your sectional or roller door should be cleaned (recommended once a month using water and a soft car brush or sponge), taking care to also clean the area above the lintel and top of the roll on roller doors, particularly in coastal environments.

An annual or more frequent polishing with an appropriate car wax will assist the longevity and appearance of your door.

For timber doors, we recommend frequent staining and oiling to preserve their natural finish. Your Dominator® distributor will advise you fully on how to maintain your door and keep its good looks.

OIL-CANNING

Oil-canning is a term used to describe the stress ripples visible in roll-formed product due to varying steel tensiles. Dominator® prides itself on producing quality products and makes every effort to limit this visual effect where possible.

With ongoing product developments, the manufacturers retain the right to change products and specifications without prior notification. If a specification is critical to the end use, please contact the manufacturer first.

This information is provided without prejudice to the standard terms and conditions of the sale of the manufacturer. This brochure supersedes all previous brochures.
