## Uninterruptable Power Supplies

Powerbank UPS is the easy way to ensure electronic equipment continues to operate during a power failure.

- **Reliable UPS** – Provides sufficient backup time to save files and shut down your system properly
- **Automatic Voltage Regulator** – Protects your system from brownouts and prolongs battery life for the UPS
- **Surge Suppressor** – Guards systems against power surges, spikes and noise across power lines
- **Phone Line Protector** – Powerbank UPS is recommended for phone systems, personal computers, faxes, cordless devices, security systems and other electronic equipment where constant power supply is critical.
- **Excellent Value** – Stable performance to maximise equipment operation under all power conditions, in a cost-effective package
- **Microprocessor Control** – automatically adjusts the system to clean unput and stabilize output voltages, ensuring constant protection against power surge and sag.
- **Torodial Transformer** – A high-efficiency torodial transformer provides low power consumption and high power output and is fitted with four power outlets
