

Global

CONTRACT SERVICES Pty Ltd

Industrial Division

Global's Industrial Division is highly experienced in the construction of polyethylene pipe lines and pipe systems, including outfall and intake submarine lines, general polyethylene fabrication works and manufacture of polyethylene products. Other works involve designing and installing Industrial piping projects in ABS, PVCC & Polybutane. Repairs, protection and reclamation of industrial equipment and surfaces are an additional service provided using a wide range of superior products and services.

Site Preparation: Firm level foundations are required, clear of sharp projections. Sand bedding of 100mm depth should be used, build up of backfill around the tank is not required. Overflow should be piped away from the foundation where the soil is likely to erode. Straight sided tank walls allow the weight to be distributed over the largest possible area. The polyethylene is sufficiently elastic to enable it to conform to the change in ground shape without damage to the tank. Foundation instructions must be adhered to or warranty is void. The tank is not designed to be buried and is done at the owner's risk. Minimum tank distance from walls or structures is 120mm. Dome Tops: These are not designed to walk on and doing so could cause the lid to dent in. Do not allow children to play on lids. Care should be taken to make sure you have a suitable surface to collect rainwater for drinking. All specifications are approximate and subject to change. Global reserves the right to modify or change their products without notice. The Written Warranty is limited to one owner, one site location, becoming void upon re-sale or movement to another site. Care should be taken to make sure you have a suitable surface to collect rainwater for drinking. Global Poly Tanks are warranted to the original purchaser to be free of defects in material and workmanship for the specified period from the date of purchase. The warranty is strictly limited to making good at the Global factory with freight prepaid. The tank colour may fade over time. Any fading is not covered by this warranty. The reproduction of product colours shown here, is as close as the photographic and commercial printing processes allow. Manufactured by Global Contract Services, 13-17 Oaks Court, Sorell, Tasmania, 7172. ACN 009 589 931
