## Huge range of lubricants and dispensing equipment

In addition to providing all your filters, Filter Discounters can supply all your lubricants at great prices. We supply packaged oil from as small as 200mL packs right through to 205L drums and 1,000L pods. And we can arrange delivery.

Filter Discounters has worked with Total Lubricants for a number of years. As one of the largest oil companies in the world, this French brand provides the complete range of lubricants for every application.

We also carry the full range of lubricants from Penrite Oil Company and sell thousands of litres of their synthetic diesel and petrol oils.

We carry many other service items and workshop devices including:

- bulk grease and grease cartridges
- spray lubricants and additives including the Moreys range of smoke killer, oil stabiliser and greases
- fuel treatments such as F-10
- Grease guns, air grease dispensers and lubricant transfer pumps
- air intake accessories, ducting, pre-cleaners (including leading Donaldson and Centri pre-cleaners)
- air filter housings
- pre-fuel filter housings and kits, fuel hose and barbs
- hydraulic breathers, level temp gauges
- batteries, cable ties, automotive compressors, 4 wheel drive recovery gear
- and much, much more!

Supplying leading brands

# Who we are

**Filter Discounters is a specialist filter and lubricant business based in Wangara, Western Australia.**

**Privately owned by brothers Andrew and Nick Flavel and supported by Operations Manager Jacob McInerney and a team of very helpful and knowledgeable staff, we carry a vast range of filters and lubricants for every application.**

We specialise in selling filters and lubricants for your machines. If you have a car, 4 wheel drive, truck, bobcat, excavator, genset, boat, tractor, harvester, drilling rig, compressor or other piece of machinery, we will have an excellent idea of the filtration and lubricant requirements for your machine. Because that is exactly what we do every working day of the year!

## Discount Prices

And what is even better than just knowing what filters and lubricants are right for your machine is being able to supply them on the spot with products of exceptional quality and meeting or exceeding OEM spec, at discounted prices.

## New Superstore

We have just expanded into our new 'superstore' which is another way of saying we have an expanded showroom and warehouse that is full to the brim with air, oil, fuel and hydraulic filters, air oil separators and lubricants.

We handle filters and lubricants by the pallet load and even container load. We have one large machinery customer for whom we bring in containers of filters directly from Europe especially for them.

So we know a lot about filters and we know what applications they are appropriate for.

We buy and sell thousands of them every month and we keep thousands in stock.

We supply most of our filters to the mining sector and we receive really good feedback from our customers regarding the demands and performance of everything we sell in the very harsh conditions of Australia's north west.

***We can offer that knowledge and experience with filter performance and standards to all our customers, irrespective of the application and environment. We are also a preferred supplier of Total Lubricants and Penrite Oil.***

## Ever wondered how hard your compressor filters work?

*Take a closer look at what the filters fitted to a 50kW compressor have to purify in 4000 hours of operation!*

### Air Filter

2.5 billion litres of air (Volume of 1000 Olympic Swimming Pools).

### Air / Oil Separator

Will separate in excess of 5000 litres of oil from a volume of 152 Olympic Swimming Pools of 90°C air / oil vapour. Delivering on oil carry over of a miniscule 2-3ppm.

### Oil Filter

11.5 million litres of oil (Volume of 4.6 Olympic Swimming Pools).

## We supply filters for every application

**Filter Discounters is a preferred supplier of many leading brands of filter.**

We spend a lot of time sourcing filters and select a preferred brand for each individual application based on the expertise of the manufacturer, the quality of production, comparison against OEM spec and value for money. Many of the brands we carry actually manufacture filters for the OEM's.

We purchase in bulk, we carry substantial inventory and we buy and sell at unbeatable prices. If you have a fleet of machines, you do don't need to run across town sourcing the filters from each machinery supplier. You can save time and money by visiting us.

If you control remote depots or work sites, we specialise in picking, packing, wrapping and palletising (if required) filters for freight. We have most of the major freight carriers visiting our warehouse daily and we know the schedules. We even ship goods daily with Australia Post. Packing filters for transport is a specialised task.

They need to be sealed from dust and packed in a specific way to minimise damage in transit. Don't leave this task to amateurs.

We also provide a 'filter kit' service for any application you have. We agree the service intervals, kit components and kit code with you and it makes for easy ordering, packing and dispatch. And we label kits very carefully so even inexperienced fitters or depot staff can identify the package and contents and minimise wastage due to incorrect identification of filters.

## Leading Brands:

**Fleetguard, Donaldson, Mann + Hummel, Filtrec, Baldwin, Wesfil, Total, Penrite, Castrol and many more.**
