

AQUALINE

modular galvanised steel tanks

Aqualine Water Tanks

Aqualine water tanks are an Australian owned and operated water tank manufacturer of high quality steel liner tanks. With a range of tanks from 15,000 litres through to 363,000 litres there is a size that will suit all applications.

Aqualine tanks commenced operations as a small specialised steel liner tank manufacturer near Lithgow in the central west region of NSW and has since grown to supply tanks across central and eastern Australia including NSW, QLD, VIC, SA and NT.

Aqualine Tank Sizes

Product Code	Litres	Gallons	Diameter (metres)	Height Metres (Inlet)	Base Diameter
ASL15	15,000	3,300	2.89	2.35	4.89
ASL22.5	22,500	5,000	3.61	2.35	5.61
ASL32	32,000	7,030	4.33	2.35	6.33
ASL44	44,000	9,670	5.06	2.35	7.06
ASL58	58,000	12,750	5.78	2.35	7.78
ASL73	73,000	16,050	6.50	2.35	8.50
ASL90	90,000	19,790	7.22	2.35	9.22
ASL110	110,000	24,190	8.00	2.35	10.00
ASL130	130,000	28,590	8.70	2.35	10.70
ASL152	152,000	33,430	9.40	2.35	11.40
ASL177	177,000	38,930	10.12	2.35	12.12
ASL203	203,000	44,650	10.84	2.35	12.84
ASL230	230,000	50,590	11.56	2.35	13.56
ASL260	260,000	57,190	12.28	2.35	14.28
ASL292	292,000	64,230	13.00	2.35	15.00
ASL325	325,000	71,490	13.73	2.35	15.73
ASL363	363,000	79,840	14.50	2.35	16.50

***Wall height is 2.3 metres from the ground to the roof connection for all tanks.**

Why Steel Liner Tanks

If you are looking to store over 50,000 litres of water or you require tanks suited to store water for firefighting, then an Aqualine steel liner tank will do the job.

The Aqualine tank is ideal for applications such as on farm water storage, large household rainwater harvesting, commercial installations, storm water harvesting and large scale industrial applications.

Aqualine Tank Features

- 0.95mm thick galvanised walls
- Aqualine's unique wall corrugation design for strength and support
- 2 panel wall design for less seams
- 50 X 50mm roof trusses which are hot dipped galvanised providing long term rust protection
- Heavy duty full circumference top support ring
- Walls are bolted together with double rows of hi-tensile bolts providing excellent strength
- Galvanised Bolt cover
- 100mm gal overflow
- 50mm outlet and ball valve
- Strainer and light guard
- High quality tank liner made to withstand Australia's harsh conditions
- Geo textile wall liners protecting the tank liner from direct contact with the wall sheets
- External removable ladder is standard

Colours

Aqualine tanks come in a range of Colourbond colours to match existing buildings and the standard colour range is:

	Classic Cream
	Deep Ocean
	Woodland Grey
	Paperbark
	Mangrove

Additional colours are available on request and there will be an additional cost associated with these.

Fully Installed

Aqualine tanks are fully installed by a professionally trained install team to ensure that the tank is assembled and installed to the highest standards.

When the tank is complete, it is ready to hold water.

Aqualine Tanks Liner

The Aqualine Polytough tank liner is strong and is manufactured to the highest standards which ensures it holds water over the long term. Polytough tank liners come in a range of materials including reinforced polypropylene, PVC, reinforced PVC and polyethylene.

Tank Accessories

Aqualine has a range of optional tank accessories which includes;

- Additional ladder
- Additional outlet and ball valve
- Larger outlets and ball valves
- Additional overflow
- Level Gauge
- Storz fire fittings
- Dust and vermin protection
- Rainsavers tank roof catchment system
- Additionally Aqualine can supply pumps, filters and other associated products.

Warranty

The Aqualine steel construction components come with a 10 year tank prorata maximum corrosion warranty.

Galvanised vs Zincalume®

With a water tank where the base comes into direct contact with the ground and with higher levels of moisture between the liner and the wall, galvanised steel out performs Zincalume®.

Additionally, galvanised steel tanks do not need to use sacrificial anodes to reduce corrosion and maintain your warranty. No need for 5 yearly anode replacement.

Site Preparation

Before Aqualine can install your new tank the site must be prepared to ensure the tank can be erected and installed correctly. Aqualine supply a comprehensive site preparation guide.

Custom Made Tanks

If there is a particular application or size requirement Aqualine can design and install a tank to meet these requirements. Your local Aqualine office will help you with the design of your own unique tank.
