

Our company & our people...

Established in 2004, The Envirofactor aims to provide high quality, professional environmental outcomes/products to meet both client needs and the legislative framework.

Wendy Hawes

Dr John T Hunter

Alan Ede

Director / Ecologist

Before joining The Envirofactor in 2011, John ran his own very successful consultancy for 20 years in Armidale. A highly respected botanist / taxonomist / biogeographer, John has wide-ranging experience in the vegetation communities of NSW and Queensland.

An Adjunct Senior Lecturer of Biogeography at the University of New England, John has extensive expertise in on-ground vegetation surveys and assessments on both private and public land including, many national parks and reserves. To date he has completed over two million hectares of vegetation mapping at 1:25,000 scale. He has a strong grounding GIS applications and vegetation community analysis software.

A prolific writer John has authored 150 journal publications on a variety of topics including; plant taxonomy, biogeography, fire dynamics, pollination, threatened species, biodiversity, and vegetation community definition. An editor on two scientific journals, John recently published a book on eucalypt identification for the Northern Tablelands.

John has a keen interest in fire dynamics providing advice to NSW NPWS regarding appropriate burning regimes within reserve areas. He has also been involved in the delivery of NCC Bushfire Hotspot training program.

Customer feedback...

*"For our Development Application we needed someone to assess our riverfront house block in accordance with council regulations. **Wendy** from **The Envirofactor** was amazing - she made a confusing process much easier and less stressful!"*

Susie - QLD
