Premium Basswood

Thermopoly Perfect for Wet Areas

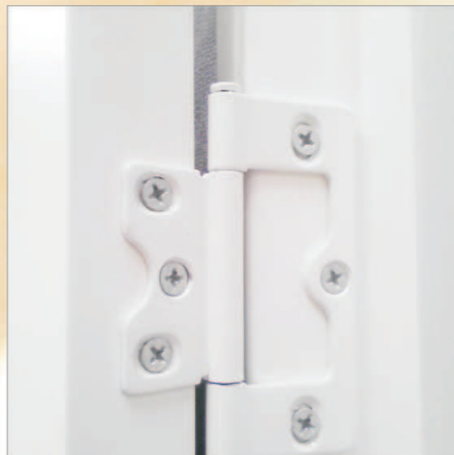

Premium Basswood

Traditional mortise and tenon Joinery for strength & stability

MORTISE AND TENON JOINTS

NON-MORTISED ADJUSTABLE HINGES

MULTIPLE SEQUENCE HAND SANDING

POLYURETHANE LACQUERED FINISH

MORTISE AND TENON JOINTS FOR STRENGTH

The industry standard for the joining of stiles and rails are relying on just glued dowel or screwed joints. These will eventually work loose.

Mortise & Tenon joints are designed to allow for maximum glue surface area to withstand shear and racking stress, to ensure long durability. This unique joinery design has been in demand in quality furniture construction, due to the combination of strength and simplicity.

NON-MORTISED ADJUSTABLE HINGES

Our high quality hinges are fully adjustable and are designed with a removable pin allowing trouble free installation. Our hinges come in a range of standard colours or are colour matched to your chosen custom colour.

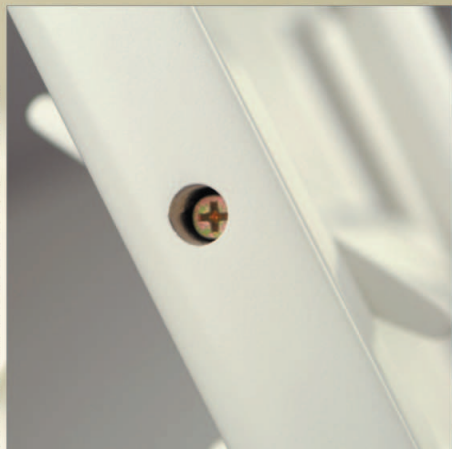

MULTIPLE SEQUENCE HAND SANDING & POLYURETHANE LACQUER FINISH

We perform, a multiple sequence of hand sanding with fine sandpaper, and coat with high quality paint or stain & lacquer. With the use of PU (polyurethane) which produces characteristics of; hardness, strength, UV-resistance, water resistance and colour retention.

Hand-finishing
for resilience & brilliance

TENSION ADJUSTMENT SCREW

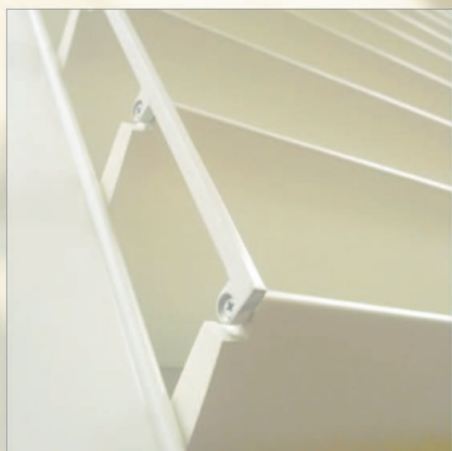

The beauty of innovative design for durability

TENSION ADJUSTMENT SCREW

The tension screw within the shutter panel allows the tension of the blades to be increased or decreased.

CLEARVIEW CONTROL

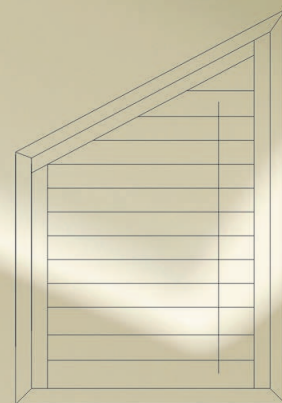

CONTROL OPTIONS

Clearview Control

For a modern clean streamlined unobstructed view, using a sturdily slimline aluminium control bar.

Centre Control

For a traditional look, using extra long quality stainless steel staples, to ensure that they will not pull out and are resistant to corrosion, assuring that the staples will hold for the life of the shutter panel.

STAINLESS STEEL STAPLES

HIDDEN, RECESSED MAGNETS

We adopt the use of hidden, recessed magnets which allow our shutter panels to close tightly while , also providing a clean and streamlined appearance.

HIDDEN, RECESSED MAGNETS

QUALITY

There is no
substitute for quality.

SERVICE

We pride ourselves in providing
outstanding service and satisfaction.

SELECTION
