AUSTRALIAN MADE

OPEN SHUTTERS

A LIFETIME PASSION

th you a lifetime.

sidered Australia's
ning.

The Open Shutters story started in 1981. It is a reflection of a lifetime of passion and commitment to creating Australia's ultimate window furnishing. Open Shutters is an Australian family-owned manufacturing success story.

Open Shutters enjoy a reputation of producing innovative shutters that not only enhance a home's appearance but provide it with benefits, rarely seen from traditional window furnishings.

Open Shutters have developed and refined the art of designing, making and installing shutters in Australian homes for Australian conditions. We've searched the world for the best materials, have developed a unique manufacturing process combining traditional craftsmen techniques with modern technology, to produce a comprehensive range of world class shutters.

Open Shutters will be with you for a lifetime. It is no wonder they are considered Australia's favourite, ultimate window furnishing.

WHY BUY AN OPEN SHUTTER?

Innovation in design and function.

Let's face it, from a distance a shutter looks like a shutter. But our discerning customers have grown to know this isn't true. Open Shutters is Australia's leading shutter manufacturer for one reason only - it's uncompromised attention to detail in design, function and quality. In short, no other shutters can attempt to claim they are an equal. Here's why:

Design - The perfect fit.

It's rare to find a truly square window, even in modern day homes. We just don't fit a shutter, we create the perfect window finish. Time consuming maybe, but it's our commitment to ensuring your Open Shutter will be part of your home for a lifetime. We don't have standard sized shutters ready for assembly. Every Open Shutter is meticulously measured and re-measured before it is created, assuring that your shutter becomes a part of your home not an add-on. In fact, windows often need customised joinery to ensure that the Shutter is properly integrated into your home. Open Shutters customise all joinery. That's the Open Shutters difference.

Shutter specialists not just shutter retailers.

Your local Open Shutter specialist designer has completed a factory induction programme, learning every facet of shutter design, measuring and installation. Accredited, our specialists have the experience & knowledge to recommend the best options for your home. It's all about what you want not what's available. With our factory-trained installers you can be assured a great experience every time.

Functional shutters - more than just good looks.

Every Open Shutter range is designed to offer your home added benefits and value. After all, your home is your castle and providing it with the best solutions will in turn, provide you with years of enjoyment, satisfaction, and a worthwhile investment. The ability to control airflow, filter light, provide privacy and reduce the transfer of heat are benefits only found in shutters. No other single window furnishing can offer all this.

Open Shutters - leading the way into the future.

Open Shutters commitment to a 'green future' is a priority. The Western Red Cedar forests of Canada are efficiently managed and are ecologically sustainable. Our environmental procedures have seen us awarded "for innovation in environmental practices". Development in design continues to achieve even higher 'natural insulation' qualities, so homes can rely less on power and more on natural energy. Open Shutters continues to lead the way.

THE ULTIMATE EXPERIENCE

The flagship of our shutter range is the Open Ultimate. Recommended by leading designers & architects for its timeless beauty, flexibility in design, durability and its outstanding thermal qualities.

The Open Ultimate range is made from premium Western Red Cedar. Being timber, it possesses many natural attributes. It allows us to innovatively design almost any shape of shutter to fit any window. Its natural inherent strength makes it the favourite for longevity.

Solid Western Red Cedar's longevity is proven by the existence of the North American Indian totem poles remarkably, still standing after hundreds of years.

The Open Ultimate's ability to reduce the transfer of heat makes it a favourite as a natural insulator.

Western Red Cedar's thermal efficiency is equivalent to four times its thickness in concrete, keeping your home warmer in winter & cooler in summer. No other window furnishing achieves this whilst allowing you to enjoy your views, natural airflow, filtered light and privacy.

The Open Ultimate range is for those who appreciate the finest. The Ultimate Shutter architecturally designed into your home, will classically reproduce heritage styles yet accommodate the most contemporary of living areas, providing you years of enjoyment and adding value to your home.

RT CHOICE

THE AFFORDABLE ALTERNATIVE

Our latest innovation is the new Smart shutter. Combining the best of both worlds, the Smart shutter comprises of a Western Red Cedar frame fitted with impact resistant blades.

It is the Smart choice for high traffic areas including hallways and war zones such as children's bedrooms and playrooms.

The Smart shutter is also suited for laundries and bathrooms.

Our customers wanted a shutter that offered the benefits of Western Red Cedar for design & installation flexibility but would take the knocks and bumps of everyday life - the Smart shutter was created.

It's affordability makes the Smart shutter a desirable alternative.

WEATHER RESISTANT METEL RANGE

METEL

FOR OUTDOOR LIVING

Australians love the outdoors and the Open Shutters range of Metel shutters continues to provide a practical alternative to solid walls or flapping blinds when defining your outdoor living areas. The strength of the Metel Shutter will withstand all but the fiercest storms. They give you the options of privacy, natural airflow & shade whilst still allowing you to enjoy the view. The design options are only limited by the rigidity and weight of the material. The ability to powdercoat and match your home means the Metel range will integrate naturally into your home. That's clever thinking.
