

LOCAL DRILLING SERVICES

CAPABILITY STATEMENT 2025

**LOCAL
DRILLING
SERVICES**

COMPANY OVERVIEW

Local Drilling Services is a Queensland-based drilling company with over 35 years of combined drilling industry experience. We specialise in exploration and water bore drilling for mining and resource clients.

We've delivered successful drilling programs for a wide range of clients – from major mining and energy companies to junior explorers, private landholders, commercial operators, and government bodies.

We have a commitment to professionalism and adhere to high standards in all our work to ensure that our operations are safe, environmentally responsible, and compliant with industry best practices. We value integrity, quality teamwork and are proud of our proactive attitude towards delivering resource definition results for our clients.

We understand that in exploration, drilling is about delivering high-quality data on time and within budget. That's why we strive for excellence in every aspect of our work. Our consistent performance and commitment to client success have earned us the trust of repeat clients who return to us year after year for their drilling needs.

DRILLING CAPABILITIES

We have multiple fit-for-purpose suites of drilling rigs & equipment ready to meet your exploration needs. Whether it is greenfields drilling, resource definition or quality & grade control programs, our experienced team will deliver efficient & safe results for your project.

PQ, HQ, NQ Diamond Core Drilling

4C & 8C Coring

Mud Rotary Drilling

Air Drilling

Hard rock and soft overburden expertise

Water production & monitoring bores

SPECIALIST EQUIPMENT & PROFESSIONAL SERVICES

- Grouting & Rehabilitation
- Down hole camera surveys
- Water flow monitoring & production projects
- Fully equipped support vehicles
- Onsite water/mud handling systems
- In-house maintenance and logistics capacity
- In-house geological and hydrological professionals
- Crew and roster flexibility

PAST PROJECTS & CLIENTS

Our team has successfully delivered exploration drilling services for clients across Queensland. We have a long history of working with mining clients completing exploration drilling programs, water monitoring programs, and quality control programs throughout Queensland.

OUR PEOPLE

Our drilling journey started in the early 2000's on oil and gas rigs in western QLD, starting from the bottom as fresh-faced lease hands, from there we worked our way through years of long, hot and dirty days to climb the ranks to become qualified drillers, then rig supervisors and managers. We then spread our wings and ventured into just about every way you can drill a hole. From water bore drilling to coal and mineral hard rock exploration, geotechnical and geothermal drilling throughout Australia and New Zealand.

Safety & Compliance

Our focus is an injury-free workplace. We strive for continuous improvement. Our Safety Health Management System is backed by highly trained and committed personnel who have achieved a Zero Lost Time Injury status since our inception in 2020.

- Fully certified managers and drill crews with Diplomas and Advanced Drilling Certifications
- State-licensed water bore drillers (Class 1, 2, 3)
- Industry-compliant SHMS (SOPs, SWPs, risk registers)
- Site-specific safety plans and inductions
- Environmental management practices in place

DIFFERENTIATORS

- Locally based in Queensland with deep knowledge of regional geology, in particular the Bowen, Surat and Galilee Basins
- Experienced and licensed water bore drillers, to meet government legislation for mining and environmental approvals when groundwater is encountered and monitoring of aquifers is required in your drilling programs
- Proven track record in remote and regional exploration projects
- Commitment to safety, environment, and client timelines
- Flexible mobilisation and fast setup times
- In-house geology and hydrology professionals

**"Safe, reliable, efficient and
high-quality exploration drilling services"**
