Our veterinary and nursing staff are a vital part of our hospital’s operation, and your pet’s recuperation will be greatly assisted by their humane care.

Amongst the range of facilities our hospital offers is a temperature controlled environment for the comfort and well being of all our patients.

ASAVA Accreditation requires all Accredited Hospital veterinarians not only to maintain, but also to continually upgrade their skills and knowledge.

For an instant historical record of your pet’s health and a guide to future care, complete medical histories are maintained for every patient.

Complete diagnostic services such as blood and urine tests, electrocardiograms, diagnostic ultrasound and endoscopy are performed in-house or referred to specialists.

All Accredited Veterinary Hospitals must provide full radiological service at all times.

Dental service including prophylaxis and extractions are also provided on the premises.

Our modern surgical suite provides a sterile environment and facilities including sterile gowns, individually wrapped sterile instrument packs and the latest operating equipment.

We understand the very real concern experienced by most pet owners when their animal requires an anaesthetic. The very high standard of equipment and anaesthetic monitoring required of an ASAVA Accredited Veterinary Hospital offers your pet the safest anaesthetic possible.

All Accredited Veterinary Hospitals provide complete pharmaceutical facilities to ensure proper medications are on hand when your pet needs them.

Your Accredited Veterinary Hospital of Excellence will ensure that sick or injured animals can be treated and monitored around the clock and if necessary, cared for in an intensive care facility.

While we appreciate that not all visits will require such extensive facilities, it is comforting to know and important for you to be aware of their availability if your pet or any animal needs them.

As you would expect, we offer the full range of routine vaccinations and regular health care – and the good news is that your Accredited Veterinary Hospital of Excellence offers all of these services at competitive prices.
Accreditation Logo

This logo and the plaque proudly displayed on our walls certifies that we are an Accredited Veterinary Hospital of Excellence, conforming to the stringent standards set by the Australian Small Animal Veterinary Association.

It is important that you are familiar with this logo and recognise which veterinary hospitals display it for your assurance of excellent service, facilities and all-round patient care.

Because your pet is important, in fact a member of your family, we set the highest standards for our animal hospitals. These standards are based upon what humans expect from their own doctors and medical facilities.

To ensure that we continually maintain the required standards, every Accredited Veterinary Hospital of Excellence is regularly inspected by an independent expert appointed by the ASAVA.
