------------	----

Hi, I'm **Tina** & this is **Troy**.
Look out for us through this
brochure for handy tips and
tricks to get the best use
out of your **Toyo** tyres.

The marking for tyre size and service description are usually located next to each other, as shown below.

reading a sidewall

TECHNICAL

TYRE SIZE

SECTION WIDTH

Width of the tyre is measured in millimetres, from the widest points of the tyre, from sidewall to sidewall.

CASING CONSTRUCTION

The "R" designates the tyre has a radial casing construction.

RIM DIAMETER

The rim diameter in inches.

ASPECT RATIO

This is the dimensional relationship of the section height compared to the section width, expressed as a percentage. In approximate terms the section height is the height of the tyre sidewall.

To calculate the section height:

$$\frac{\text{Overall Diameter} - \text{Rim Diameter}}{2}$$

To calculate the aspect ratio:

$$\frac{\text{Overall Diameter} - \text{Rim Diameter}}{\text{Rim Diameter}} \times 100$$

SERVICE DESCRIPTION

LOAD INDEX

An index number indicating the tyre's maximum load capacity.

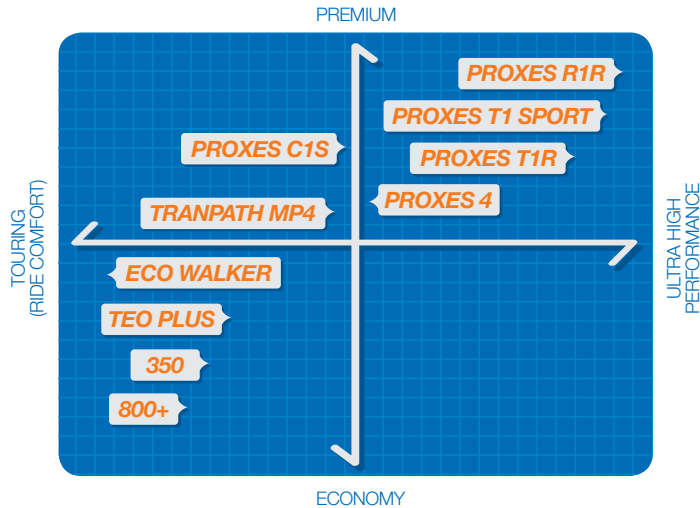

SPEED RATING

Denotes the maximum speed for which tyre is rated

M -130km/h	V -240km/h
S -180km/h	W -270km/h
T -190km/h	Y -300km/h
H -210km/h

PROXES T1 SPORT

ULTRA HIGH PERFORMANCE

The **PROXES T1 SPORT** provides exceptional levels of cornering and braking grip in wet or dry conditions, high speed stability and fast steering response.

The asymmetric tread pattern provides low tread noise without compromising performance.

This tyre is suitable for high performance sedans and coupes.

performance

PROXES T1 SPORT

FEATURES

Wide outer blocks

- Improving handling and steering response. The design ensures great road grip and feel

Wide straight grooves

- Improved wet weather performance

Inner rib and notch

- Improving braking performance
- Reduces irregular wear resulting in a quieter and more comfortable ride

Wide centre rib

- Straight-line stability during high speed highway driving

Asymmetric, non-directional tread design

- Quick responsive steering and driving stability
- Improved braking and cornering performance

PROXES R1R

INTERMEDIATE ROAD & TRACK

The **PROXES R1R** allows the driver to go beyond the normal capabilities of an ultra high performance tyre and gives the ability to take your car to the track and compete socially.

The modified radial construction and a steel ply in the sidewall increases stiffness for crisper handling.

This tyre will suit the user that is looking for extreme performance.

performance

PROXES R1R

FEATURES

Silica-reinforced, high-grip tread compound

- Improves grip for better handling and performance during high-spirited driving

Unidirectional arrowhead tread design

- Achieves balanced performance between wet and dry conditions

Tapered centre block edge

- Stabilises centre block movement to decrease irregular wear
- Helps to increase hydroplaning resistance

Multi-width EVAC channels

- Improve water evacuation
- Narrow width at the tyre edge widens the shoulder block area to enhance steering

Stability control slits

- Provide resistance to irregular wear
- Improve dry performance by maintaining block stiffness during aggressive braking

PROXES T1R

ULTRA HIGH PERFORMANCE

The **PROXES T1R** is an ultra-high performance tyre designed for the driver that takes their car to the edge.

Having exceptional resistance to aquaplaning, improved wear resistance, cornering and braking grip in wet and dry conditions, ride comfort, resistance to irregular wear and reduced tread noise.

performance

PROXES T1R

FEATURES

"Generation S" silica-reinforced, high-grip tread compound

- Improves wet performance while providing excellent dry performance

Refined unidirectional tread design

- Provides excellent dry and wet performance

V-shaped main grooves

- Disperses water for better wet performance

Rigid shoulder rib-bands

- Improves cornering for exceptional dry performance
- Reduces irregular wear for a smooth, quiet ride

Parallel shoulder slits

- Helps reduce irregular wear

PROXES 4

SPORT TUNER

The **PROXES 4** is a low-profile, high performance tyre with a unique directional tread pattern that has excellent aquaplaning resistance.

The advanced silica tread compound ensures improved tread mileage and impressive wet road grip.

performance

PROXES 4

FEATURES

"Generation S" silica-reinforced, high-grip tread compound

- Increased silica in tread compound improves wet performance while providing excellent dry performance

Unique "W-Shape" tread pattern

- Provides a good balance between wet traction and dry performance

High angle tread grooves

- Evacuates water to improve wet traction

Curving centre rib

- Enhances directional stability

Multi-wave sipes

- Minimises irregular wear for a smooth, quiet ride
- Increase all-season traction

*To have a longer use & life out of our tyres, we regularly have **tyre rotations** done.*

*Did you know that **correct** tyre pressure can help you **save fuel**?*

TEO PLUS

TOURING & CRUISING

The **TEO PLUS** is an affordable and high quality non-directional tyre.

For the driver that is concerned with low tread noise, long tread life, ride comfort and a tyre that requires little maintenance.

The Teo Plus is available in both low profile and standard tyre sizes.

family

TEO PLUS

FEATURES

Wear-resistant silica tread compound

- Long tread life, low rolling resistance and high levels of traction on wet roads

Closed shoulder grooves and "3D multi sipes" in tread shoulder blocks

- Minimised tread flex on the tread shoulder for optimum dry road grip, minimised irregular wear and tread noise

Wide main circumferential grooves

- Aquaplaning resistance

"Silent Wall" circumferential grooves

- Minimised tread noise (high pitch)

Non-directional tread pattern

- Low tread noise and simplified rotations

*Did you know that **correct tyre pressure** will maximise the tyre's life and save you money in the long run.*

ECO WALKER

TOURING & CRUISING
(FUEL EFFICIENT)

The **ECO WALKER** is a passenger car tyre specifically designed to minimise vehicle fuel consumption by providing exceptionally low rolling resistance.

The Eco Walker also provides high levels of ride comfort, low tread noise and high levels of wet weather grip.

family

ECO WALKER

FEATURES

New high-repulsion silica reinforced tread compound

- Exceptionally low rolling resistance and high level of wet road grip

Lower tyre mass compared to conventional tyres

- Minimised rolling resistance

Non-directional, rib/block tread design

- Minimised tread noise and irregular wear
- Can be rotated to any position

Optimised tread profile

- Minimised rolling resistance

*Did you know that correct wheel alignment can **improve vehicle handling**, increase tyre life and help you save on fuel consumption?*

Fuel Saver Tyre - Advanced High Silica Compound

350

TOURING & CRUISING

The **350** is an affordable all round tyre suited for most small to medium vehicles.

The **350** has superior wet weather performance, whilst retaining excellent life, low tread noise and ride comfort.

family

350

FEATURES

**Wide trumpet-shape
slits form tread centre
to shoulder**

- Superior water drainage for aquaplaning resistance

3 main straight grooves

- Directional stability and aquaplaning resistance

**Gently sloping groove at
shoulder and lateral sipes**

- Extra water dispersion while maintaining block stiffness to prevent heel/toe wear

Variable pitch tread blocks

- Minimised tread noise

**Balanced-stiffness
bead area**

- Good ride comfort and steering response

Lower rolling resistance

- Improved fuel economy

800 PLUS

TOURING & CRUISING

The **800 PLUS** is an all-season tyre suited to older passenger vehicles.

The 800 plus provides long tread life, low noise and exceptional ride comfort.

family

800 PLUS

FEATURES

Two straight and one zig-zag circumferential grooves

Square shoulder design with increased tread footprint area

Lateral grooves aligned across tread

More regular designed tread blocks with tapered edges

BENEFITS

- Enhanced directional stability during straight running and cornering, in both wet and dry conditions
- Improved cornering, handling, traction and also minimises shoulder wear
- Improved lateral water drainage
- Minimised tread noise

SIZES

75 Series

P185/75R14 98H

*We always **check our tyres once a month** for cuts, punctures, uneven wear and other damages. It only takes a few minutes to do and will **help protect** us, our family, vehicle and tyres.*

PROXES C1S

TOURING

The **PROXES C1S** is designed for premium and luxury sedans.

The Proxes C1S provides high grip levels and sharp steering response, while also providing a comfortable and quiet ride.

Luxury

PROXES C1S

FEATURES

"Silent Wall" circumferential grooves

- Minimised tread noise (high pitch) on smooth road surfaces

Wide rib at quarter point and narrow groove with dimple

- Good dry and wet handling, directional stability and ride comfort

Wide straight groove

- Water drainage suitable for heavy rain conditions

Wider rib at shoulder with twin grooves

- Good high speed stability and dry cornering grip

5 Variable pitch

- Minimised tread noise
