

Ventilated Shelving

Why is it the most popular and commonly used product in the USA housing market and growing?

- Cost effective, fast and easy to install
- More durable than melamine shelf and rail
- High quality US-made product
- Flexible, easy to add on later or upgrade
- More storage for clients needs
- Air circulation for fresher clothes
- Hygienic – no silverfish or insects
- Solutions for every room in the home
- Certified sustainable product

CLOSETMAID

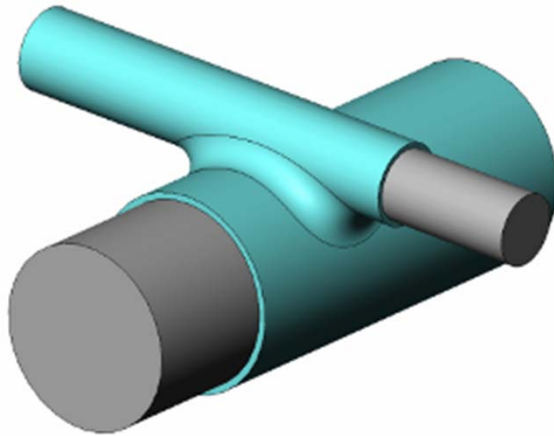

ENVIRONMENTAL RESPONSIBILITY

The steel used to make ClosetMaid's wire shelving is melted from 90-100% post consumer scrap. ClosetMaid® is in the process of obtaining certification on our wire shelving for Recycled Content (LEED® Credit 4.1 and/or 4.2). We are also a member of USGBC (United States Green Building Council).

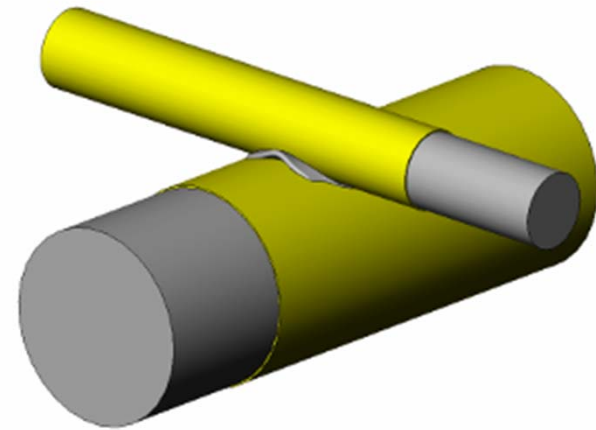

ClosetMaid® chose to undergo certification with the Recycled Content assessment by Scientific Certification Systems, and as a result, are hoping to achieve this highly recognized certification proving we're on the path towards sustainability.

U.S. Green Building Council (USGBC) is a 501(c)(3) nonprofit composed of leaders from every sector of the building industry working to promote buildings and communities that are environmentally responsible, profitable and healthy places to live and work.

Vinyl is the superior shelf coating

Vinyl covers both wires and welds

Epoxy does not effectively cover the weld residue

- Vinyl encapsulates the shelving eliminating rust and burrs
- Will not rust, crack, or chip
- Superior to cheaper Chinese made epoxy coated substitutes
