Business Overview June 2020

1. INTRODUCTION

Ulan Water is a locally owned business in the Ulan area of the Central West region of New South Wales. A 40-minute drive south to the township of 'Mudgee'. Our core business being a supplier and carter of drinking water.

Ulan Water has high quality water storage, drinking water facilities, drinking water trucks complemented by trained and experienced operators. As a drinking water supplier, Ulan Water operates under the auspices of the NSW Public Health Authority for its drinking water management. This is for the NSW Health Authority monitor and audit processes. As a water carter, Ulan Water is NSW Food Authority accredited.

We also have a fleet of mine approved earthmoving vehicles and equipment, providing professional experienced operators to complete any civil construction work. Other services offered are, wet and dry plant hire, mining services, ground maintenance and labour hire.

All Ulan Waters vehicles and mobile plant have GPS monitoring appliances for easy location monitoring and onboard cameras for fatigue management purposes.

2. COMPANY HISTORY

Ulan Water commenced supplying and delivering potable water to our local community 15 years ago. That role continues today to locals on a domestic basis and mine sites including Moolarben, Ulan Coal and Wilpinjong on a non-domestic basis.

With the expansion of Glencore's Ulan Coal facilities, Ulan Water provided the mine with specific earthworks for the new MF/RO plant infrastructure. Other works included construction of new pads and hard stand areas. Road maintenance and repairs, pipeline works, inspections and weed spraying are other activities that occur on an as needs basis.

We are currently working with Ditchfield Contracting at Moorlarben Coal Mine, transporting fill on site and from local quarries. We also work with our local quarry Ulan Stone, transporting their products to the local community and mine sites.

3. **COMPANY SAFETY, LEADERSHIP AND COMMITMENT**

A Work Health and Safety (WHS) Policy is established to declare Ulan Waters commitment to Workers health and safety. A Health and Safety Management System (HSMS) is developed and implemented to support the WHS Policy claim.

Ulan Water Management demonstrates leadership and commitment with respect to their overall responsibility and accountability for the protection of workers and other interested parties, into the operations. This includes those resources required for HSMS integration.

Risk assessments have been undertaken for various events at the business.
