

**With a track record spanning almost 15 years Melbourne Shade Sails is one of Australia's most recognised and trusted providers of quality shade sail installations. Having served thousands of customers throughout the greater Melbourne region our success is a direct result of our passion for Australian product quality and customer service.**

We are a privately owned family business originating from the outer suburbs of Melbourne's north east. Our background in textiles and upholstery made the transition into fabrication of quality shade sails a natural progression. Today, having recently moved our production to a larger factory in Thomastown we are proud to provide continued service to our community, as well as secure employment for a growing local work force.

## Shade sails for any purpose

A shade sail can be a great looking addition to your home while protecting your family and property from exposure to the harsh Australian climate in any number of practical applications, including:

- ▶ Backyards and swimming pools
- ▶ Schools and playgrounds
- ▶ Car parks and driveways

Having worked extensively with local government and businesses (not to mention hundreds of local home owners) we are Melbourne's most trusted providers of quality shade sail installations.

## Tailored to Australian needs

With one of the highest levels of UV exposure in the world the Australian climate presents unique challenges that many overseas products struggle to meet. Our product range has been designed especially for the Australian environment, using only materials that meet (or exceed) the level of UV protection required in Australia.

We also understand the importance of style, which is why we have developed a range of materials and colours to suit both contemporary and traditional Australian architecture. Our Australian colour range is designed to suit any type of home, from a heritage property to a modern estate and everything in between – even a colourful playground!

## Simple 3-step installation

### 1 Free on-site measure and quote

At your request, one of our design consultants will visit your home to discuss your plans and present you with a range of options for your shade sail installation, including material and colour samples. We will also prepare a fixed quotation for your installation during this visit.

### 2 Post and bracket installation

During our second visit all posts and brackets are installed so that we can take precise measurements for the fabrication of your sail(s). This process also allows the concrete used to install your posts to set properly before tension is applied.

### 3 Sail fabrication and installation

Your sail(s) are then custom fabricated and installed during a final visit. Our installation process is designed to ensure a perfect fit, eliminating the need to use long chains to extend the corners of each sail.

## Quality that is second to none

From the galvanised steel posts to the stainless steel fixtures and fittings, our entire product range is produced using the best quality materials available.

We strictly use Australian suppliers that have proven the quality of their work over years of service to our community. The quality of our product is our trademark, and we protect it above all else.

## Peace of mind comes standard

In Australia UV protection is one of the most important considerations when installing a shade sail. To provide our customers with the ultimate reassurance every shade sail we install comes with a **10 year warranty** against UV break down. With our shade sails you can rest assured that your family is protected for years to come.

## Free on-site measure and quote

If you're still thinking about installing a shade sail why not take advantage of our free on-site measure and quote?

At your request one of our design consultants will visit your home and help you finalise your plans, as well as advise you on colour selection and what shapes and materials will best suit your property.

For more information or to book your free consultation, give our office a call and one of our friendly staff will be happy to answer all your questions. You can also find more information on our website, including a photo gallery with more examples of our work. We look forward to hearing from you!
