

Liquefied Petroleum Gas

20 October 2016

When piped natural gas is not available in your premise, the next best alternative is the use of Liquefied Petroleum Gas (LPG); as bottled Liquefied Natural Gas (LNG) is not cost effective for homes and small businesses.

More so with the constant increase in electrical cost, it may be prudent that you consider installing LPG gas to your all electric home/ business to mitigate your monthly energy cost. Casotti Plumbers are always ready and prepared to help you to change-over from your all-electric to gas enabled.

Learn more about how to LPG in your area, call 0418 911 592
