

- Highest hot water recovery rate in the heat pump market
This means that your customers won't run out of hot water.
- Excellent for use in poor water conditions.
- NO BOOSTER ELEMENTS – don't need them!
Quantum heat pumps can operate in ambient temperatures from a low of -10°C !
- Over 30 years of ongoing product development means that Quantum continuously improves the energy efficiency of the heat pumps while at the same time reducing component, manufacturing and installation costs.
- Easy Installations – No Solar Roof Panels
- Cuts up to 75% of running costs compared to Electric & LPG Gas units.
