

Turfing adds the finishing touch to any garden.

Before choosing the type of turf for your garden you will need to consider the exposure to frost, whether the area is sunny or shaded or both, how quickly the grass grows and general maintenance issues, the amount of traffic that passes over the grass and how soft the grass is.

Remember a lawn is only as good as the time and work that goes into preparing the area. This involves leveling or grading and spreading with a good turf underlay.
