TRANSPORT ENGINEERING

(08) 8346 3711

280 Cormack Road, Wingfield

Since 1975

Aldom Transport Engineering are well known for our customisation capabilities drawing from over four and a half decades of experience and have faced every conceivable concept and design, delivering tens of thousands of transportation products over its illustrious existence.

Our friendly sales and design team are continually on the look-out for ways to minimise your operating costs, through innovative design, and by offering the lightest tare weight wherever possible, without compromising the durability or life of the asset. Coupled with the latest fuel savings aerodynamic products around such as wind deflectors, all complemented by our latest streamlined designs.

Just ask around, we have been doing this since 1975
And our customers keep coming back!

Furniture Pantech Bodies

ALDOM Transport Engineering – Furniture Pantech Bodies are an industry leader, its smart design delivers strength while being lightweight, waterproof from the elements, easy to repair, exceptionally adaptable and one of the most recognised motor body panelling system around. Check out the vast application styles and options available.

Refrigerated

ALDOM Refrigerated bodies and trailers are far superior in not only design, quality finish, durability, and insulation due to making our fibre composite panel (FCP) right here on site. We produce and guarantee every aspect of our refrigerated bodies and have a solid history of outstanding performance and affordability. Click below to find out more about our **Super Cool FCP Refrigerated System**.

Tautliners

ALDOM Tautliners / Curtain Siders have heavy-duty front walls, single sheet aluminium roof with ply underneath and can be insulated. They are stitch welded around the floor to the coaming rail with 30mm lip (unless not required). Each unit is provided with access steps and fitted with 'Barn Doors', four hinges and cam locks.

Trays

ALDOM Trays are built tough, designed for the harshest of Australia's environments, fitted with tie rails, cab height headboard with 600mm high bash plate, 30mm coaming lip, access steps both sides front and rear with an underrun bar to suit the rear (tow bar independent). Aldom Transport Engineering can also supply split or one-piece dropsides.

Tippers

ALDOM Tippers are designed for today, focussed on tomorrow, Aldom tippers are designed and built from high-quality materials to make them tough. Our tippers can be made from Hardox or normal mild steel and are fitted with rails, access steps, headboard guards, and two-way hinged air operated tailgates.

Panelock

ALDOM Panelock aluminium wall system is an industry leader, its smart design delivers strength while being lightweight, waterproof from the elements, easy to repair, exceptionally adaptable and one of the most recognised motor body panelling system around. Check out the vast application styles and options available.

Service Body

ALDOM Service Bodies are the pinnacle when it comes to servicing your field assets, whether you are looking for some basic toolboxes right up to complex well thought out applications including compressors, generators, fuel and water tanks, pumps complex tool boxes ALDOM has you covered!

Trailers Light

ALDOM Trailers [Light] Under 4.5 tonne – There is nothing we can not design and build when it comes to your light trailer application. We can even modify, enhance or certify your current asset.

Trailers Heavy – Coming Soon

ALDOM Trailers [Heavy] Over 4.5 tonne – There is nothing we can not design and build when it comes to your light trailer application. We can even modify, enhance or certify your current asset.

Custom Builds

ALDOM Transport Engineering Custom Builds is where it all started, our bespoke design and build is what we do best. If you have a special project we can 3D model it to ensure it will be exactly what you require, then deliver a superior quality build and finish. We have hundreds of past jobs experience to draw from and will align the 'right fit' for your application or project.

Motorsport

ALDOM Motorsport bodies are all made to customer requirements that could include a new cab or comfortable living quarters. In motorsport vehicle transporters this includes well-appointed kitchens and bedrooms without compromising on space for the cars (open-wheelers, closed, motorbikes, buggies and even high-end Marques).

ALDOM FCP

ALDOM FCP [Fibre Composite Panels] are made here in-house, we can make panels from 2500 mm wide to 10.5 metres long, and from 35mm thick to 200mm.

ALDOM FCP can be used as motor bodies as we currently build, but also the building industry for office wall partitions and many more applications.

Tailgates

Dhollandia has a global reputation in delivering superior safety, quality and durability and as a distributor, **ALDOM Transport Engineering** are proud to offer their products.

Doors/Steps

ALDOM Transport Engineering offers many varieties of doors and steps, we can design and build to your exact requirements or supply and fit off the shelf products for any access solution.

Towbars

ALDOM Transport Engineering design, certify and custom build any towbar application you may require, we can also provide chassis extensions to facilitate your towing requirements.

ENGINEERING

Design

We are flexible in the work that we carry out and can adapt to any type of bespoke engineering and manufacturing you may require.

Modifications

Our qualified highly skilled team can carry out modifications to OEM chassis' to accommodate any wheelbase required to suit your body/weight requirements. Our in-house engineering team work directly with the OEM and are recognised by DPTI to sign off on chassis modifications.

Certification

Aldom Transport Engineering prides itself on creating opportunities for people that have the expertise within a field which we can utilise. Therefore we have our own in house engineering team where we can provide engineering services for our customers. This includes design, ADR compliance, tow bar compliance, bus seating compliance, chassis extensions, lazy axle fitments and many more. For a small fee, our engineering team can provide drawings and blue plates to allow for ease of vehicle registration and compliance.

Roadworthy

Have you just failed a roadworthy inspection?

Our in-house Engineering team are Authorised Vehicle Examiners (AVE) recognised by DPTI to sign-off on any rectifications.
