Keyless Digital Deadlatch

- Unlock with pin or key card
- Program multiple user codes

Keyless Digital Deadbolt

- Touch screen pin code access
- Program multiple user codes

The 001Touch™ Digital Deadlatch combines a stylish digital touch screen keypad with the security of the iconic Lockwood 001® Deadlatch. The simple convenience of using a pin code means you never have to carry keys again!

Illuminated touchscreen keypad

The touch screen keypad has no mechanical buttons which means no trace of your secret pin code.

Pin code or key card

Choose the convenience of a pin code or key card. One master pin code will manage up to twenty user pin codes. Up to 20 key cards can also be programmed.

Cryptic code function

Prevent others from identifying your pin code during access. The cryptic code function confuses the onlooker but at the same time allows you to still gain entry.

User code that expires

A temporary pin access code can be programmed to last from three hours to two weeks. This is ideal for allowing short-term access to your property and reduces the potential risks in giving your keys to a tradesman, cleaner or neighbour.

Visual guide for programming

For added convenience, an illuminated guide will assist in the programming of your 001 Touch™.

Low power consumption

Four standard AA batteries will unlock a door up to 10,000 times. A warning light will appear when the battery level reaches less than 30%.

Battery check function

The battery level can be checked without removing the batteries.

Emergency battery connection

In the event the battery goes flat, two battery contact points will fit a standard 9V battery. A temporary charge will allow entry with the pin or key card.

Smart memory

The settings, codes and key cards will remain programmed in the lock should the batteries go flat.

Keyless Digital Deadlatch

Internal Case Assembly	High purity zinc alloy
Battery Cover	High quality ABS plastic
Backset	60mm
Latch	Stainless Steel 18mm projection

Inside

Outside

No Keys? No Worries. The Lockwood Digital Deadbolt lets you unlock your front door by entering a simple code.

Ideal for use on new doors or as a replacement on an existing door lock on your home, the Keyless Digital Deadbolt is also suitable for internal and light commercial doors such as storerooms and shop fronts.

Illuminated touch screen keypad

The touch screen keypad has no mechanical buttons which means no trace of your secret pin code. One master pin code will manage up to twenty user pin codes.

Cryptic code function

Prevent others from identifying your pin code during access. The cryptic code function confuses the onlooker but at the same time allows you to still gain entry.

Visual guide for programming

For added convenience, an illuminated guide will assist in the programming of your Digital Deadbolt.

Low power consumption

Four AA alkaline batteries will unlock a door for approximately 12 months if used 10 times per day. A battery icon will begin flashing when the battery level reaches less than 30%.

Emergency key override

In the event your battery goes flat there is a key override function that will prevent you from being locked out.

User code that expires

A temporary pin access code can be programmed to last from three hours to two weeks. This is ideal for allowing short-term access to your property and reduces the potential risks in giving your keys to a tradesman, cleaner or neighbour.

Code lockout settings

Privacy mode allows you to deactivate the external keypad from the inside providing a secure environment from others who may have pin code access. By using your master pin, you can also restrict all user pin access.
