Unique Australian Patented fixing Method free from mechanical fasteners. Unlike screw-clamp or riveted systems, BasiX Barrier Screens use innovative technology that provides clear spacing between the infill and aluminium frame. This greatly reduces the opportunity for galvanic corrosion, which occurs when dissimilar metals come into physical contact.

Key Features

- 316 Stainless Steel Infill provides excellent corrosion resistance—Ideal for coastal environments
- Available in 19 standard colours
- Excellent air flow
- Woven mesh provides unobstructed views
- More attractive than Diamond Grille but just as affordable
