

SPLITTING & CRUSHING

We have great experience in concrete and rock splitting and crushing.

Crushing can be done by hand held machine up to 300 mm thick.

Splitting is great for mass concrete and rock. Quiet and vibration free.

Splitting large hob wall

Core holes at Warragamba dam 950mm diameter x 1100mm deep

Concrete Cutting Specialists
For Good Penetrations

9905 8188

Diacore is a concrete cutting company that has been drilling and sawing in the Sydney area for over 30 years.

We also have done major projects in NSW country and interstate. We have a wide range of equipment which allows us to solve any problem you might have to do with concrete cutting or drilling.

Core Drilling

We can drill 12mm to 1 Metre in diameter at any angle or inverted. Holes for waste pipes and small conduits thru slabs to long holes. Large holes for anchor heads and pipe lines.

Track Mounted Wall Sawing

To a depth of 700 mm in concrete, brick or stone. We have Diesel, petrol and 3 phase power packs for any application.

Road Sawing

We have saws from small push along to large diesel and 3 phase electric for confined or poorly ventilated areas.

Hand Sawing

Can cut up to 150 mm deep with petrol or Hydraulic for non ventilated areas.

Ring Sawing

Will cut to 265 mm deep in Concrete, block or brick.

Wire Sawing

For mass reinforced concrete, brick or stone cutting any size.

Wire sawing wharf at Koorigang island

Chain Sawing

Hydraulic diamond chain sawing to a depth 450 mm is good for stopping over cut on penetrations.

Plunge Sawing

Is use for cutting penetrations without over cut up to 1100 mm deep instead of stitch drilling
