[Robotic Partial Nephrectomy](#)

[Robotic Cystectomy](#)

Dr Scott Leslie is a urological surgeon with expertise in robotic surgery, advanced laparoscopic surgery and in the treatment of patients with urological cancers. Dr Leslie is focused on achieving the best outcomes for his patients by utilising the latest surgical technology in his practice and by listening to what his patients and their families desire from their treatment. He understands that patients' goals extend beyond cure of their disease and include achieving the best functional results following surgery.

Dr Leslie received unparalleled training and experience in robotic surgery during his fellowship at the University of Southern California (USC) in Los Angeles. He primarily treats patients with prostate, kidney and bladder cancer, but also has an interest in surgery for kidney stones as well as for enlarged prostates causing urinary difficulties. Dr Leslie is committed to teaching and regularly instructs in robotic surgery for urologists throughout Australia who are learning these novel surgical techniques.

Fellowship trained in Los Angeles

Dr Scott Leslie trained with the world leaders in robotic surgery and laparoscopic surgery at the University of Southern California.
