Glass Balustrade

Stainless Steel & Clamps

This is a very stylish and modern look Balustrade, featuring 50mm round top rail and posts, glass is fitted using Stainless Steel Clamps, providing maximum visibility. Tinted Glass is also available.

Round Rails Series 60

This is a welded aluminium, continuous rail balustrade where glass is fixed top and bottom. In this way we can obtain tighter curves on balustrades and it lends itself to using more cost effective standard size toughened glass panels. The posts come with the option of core fixing or fixed foot plates.

Square Post Series 50

A square section glazing post with round or oval continuous handrails are available. The glass is side fixed and secured using glazing wedge rubber. Posts can be fitted by core drilling the posts or using a fixed footplate.

Series 7040

This balustrade is elegant with its continuous oval rail, welded aluminium design. Glass is fixed top and bottom in an oval glazing rail visually lightening the appearance without comprising strength.
