

# AJ Stock

Craftsmanship in  
transport engineering  
since 1896

## Tipper & trailers product overview

AJ Stock has built over a thousand tipper bodies Australia-wide—and they are being used in a range of applications.

We are leaders in supplying local councils, state government bodies, mining companies, water authorities and private contractors.

**Tandem tippers:** our extra heavy-duty construction reduces the strain on the truck body when used in tough conditions, so you know you've got a hard-wearing, long-lasting tipper body.

**Small tippers**

**Split tippers**

**Dog trailers**

**Plant trailers**

**3 way tippers:** give your organisation flexibility and reliability.

All of our tippers and trailers are built from designs proven over many years. Strong and reliable, they all come with the usual craftsmanship you'd expect from AJ Stock.
