# CHOOSING THE RIGHT SOLVER EXTERIOR COLOURS

Creating the perfect colour scheme for your home has never been easier with the wide range of colours from Solver.

With over 90 years of experience in paint and colour, you can trust Solver to protect your home from the harsh Australian weather conditions, whilst creating a picture perfect exterior that will last for many years to come.

before

after

## COLOUR INSPIRATION

Exterior colour schemes need to complement your home's architecture and surroundings. Solver has sourced a number of stunning exteriors in a variety of architectural styles designed to provide you with inspiration for your own colour scheme.

We have arranged our most popular exterior colours into easy to use colour palettes. Select your personal favourites to complement your home's surroundings and reflect your style.

## HOW TO USE THIS CARD

Solver has made choosing your perfect exterior colour scheme easy for you. Choose the colour palette or house image that appeals most to you. Each palette has been laid out in a range of popular light to dark colours which are suitable for exterior walls and architectural features.

Soft neutrals and dark grey tones for trims are currently the most popular exterior colours. These popular colour palettes will help you create a stylish exterior.

## COLORBOND® COLOURS

Solver has selected four Colorbond® colours at the bottom of each palette for you to use on your roof, window, door and trim areas. These colours have been designed to complement other colours in the palette.

## TESTING YOUR COLOUR CHOICE

A sample pot is the perfect way to confirm your final colour choice. Brush out one square metre of paint and view your colour at different times of the day. Before making your final colour choice, check that it co-ordinates with roof and trim colours.

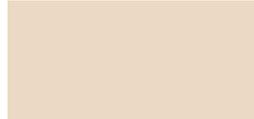

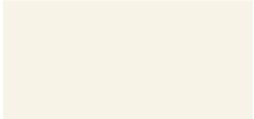

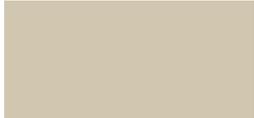

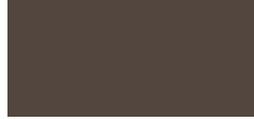

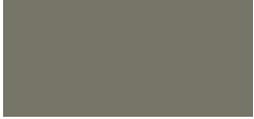

# NEUTRALS

Stony, natural colours work well on all house styles. Use different shades of the same colour for a seamless look to your exterior.

## HINT

Use light and white colours to make a building look larger and accentuate architectural features.

## BLUES

Tranquil blue colours are perfect for trims and accents of traditional homes, or try a blue mid tone for modern, rendered homes.

### HINT

*Always check the weather forecast before you start painting exteriors. Avoid painting in very high or low temperatures.*

STONE  
WASHED

SOFT  
APPARITION

# GREENS

Soft, natural shades of green are a sophisticated choice for both modern and traditional homes. They combine well with cream or charcoal accents.

## HINT

*Always ensure your exterior is properly prepared before you start painting. This will ensure a smoother and longer lasting paint finish on your home.*

### COORDINATING COLORBOND® COLOURS

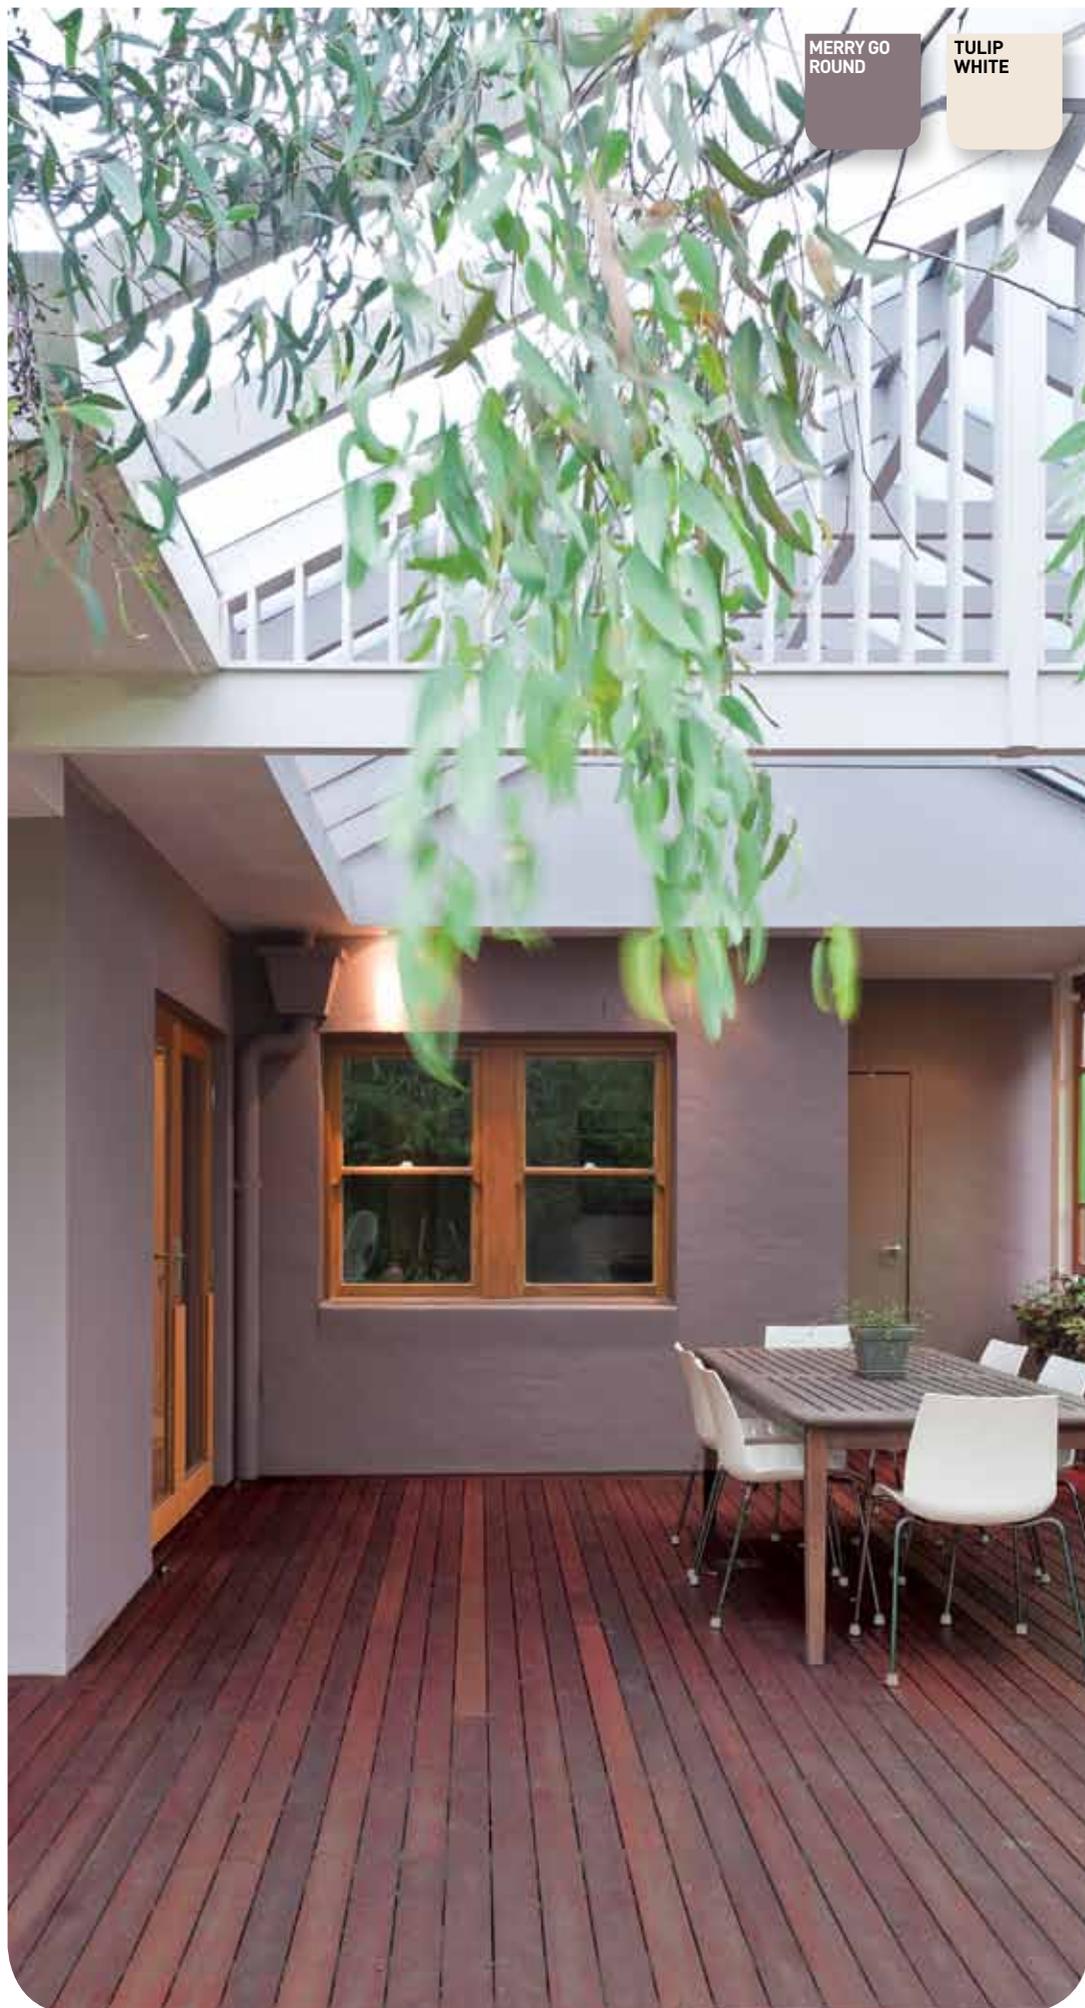

## REDS, ORANGES & YELLOWS

The earthy hues of nature harmonise well with soft creams and honey tones. Use rich tones for front doors and architectural features.

#### HINT

*Always remember to consider your roof colour when painting your home. Paint doesn't need to match the roof, but it does need to work harmoniously within your colour scheme.*

MERRY GO ROUND

TULIP WHITE

# PURPLES & PINKS

Classic purples and elegant shades of pink are popular for modern homes. Use bright colours sparingly, on larger areas use more muted tones. They work well in combination with grey neutrals.

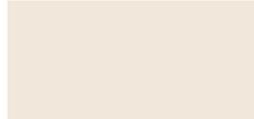

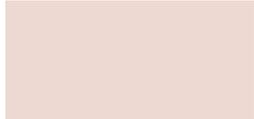

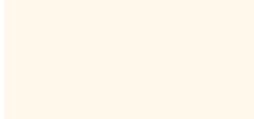

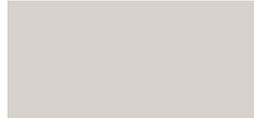

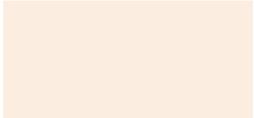

## HINT

Look at house styles and colours in your street to get ideas on what might work best for your home.

# OUTDOOR ENTERTAINING

Outdoor rooms are the perfect place to experiment with bold colours and fashionable shades. Pick a colour and then use outdoor accessories such as cushions to co-ordinate.

## HINT

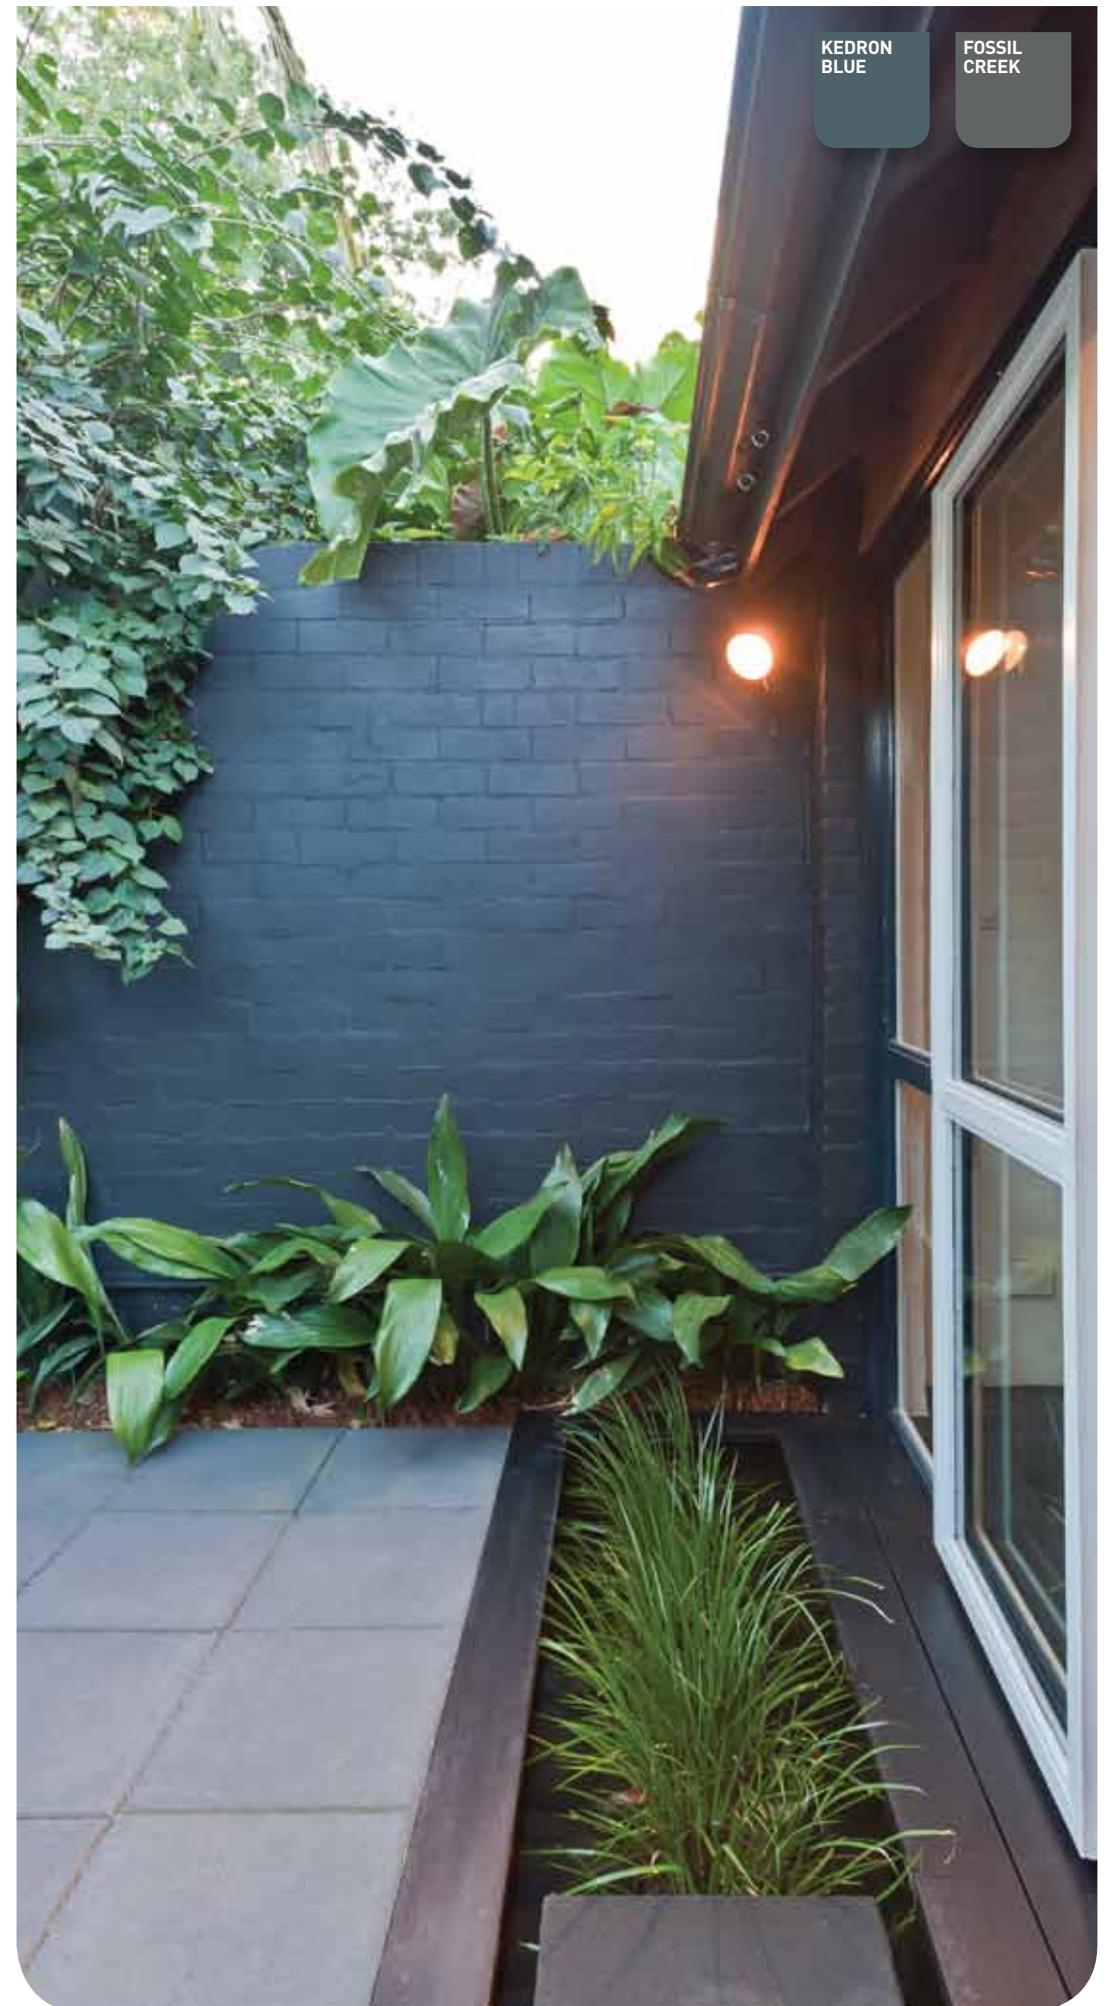

*A lower gloss paint will hide surface imperfections and is especially suited to brick or uneven render work.*

# SOLVER EXTERIOR PAINT

Whatever exterior surface of your home you are painting, Solver has the perfect paint finish for your job. Solver paints are made to the very highest professional standards, with a range of finishes to suit every application including: fence, roof, walls, doors and trims.

## DURAGUARD

Duraguard® is a complete range of ultra premium, self priming water-based coatings, formulated to provide outstanding durability.

### Solver Advanced Technology

Incorporating a combination of flexible polymers and ultra violet (U.V.) absorbers for the ultimate weather protection, Duraguard® also contains powerful anti-fungus agents to inhibit mould and fungal growth.

### Duraguard Product Range

Duraguard® is the same product you have come to love and rely upon to protect your exterior surfaces. Available in four sheen levels - Matt, Low Sheen, Satin & Gloss, there's a product to suit every application.

### 15 Year Warranty

Duraguard's advanced technology means that we can now offer a 15 year Warranty against, flaking, peeling or blistering.

### Aqua Trim & Trims

A complete range of water based and traditional solvent based enamels designed to provide outstanding durability and performance on interior and exterior doors, windows and trims.

### Preps

Preps is a comprehensive range of high performance undercoats, primers and sealers for Broad-walls, Timber and Metal. Comprised of both water and traditional solvent based products, there's a Prep coat for every application.
