Express yourself with colour

COLOURFUL, LOW PROFILE SWITCHES AND OUTLETS

**Bold**, subtle, striking,  
soothing, happy, **energising**,  
**passionate**, rejuvenating...

## **colour** has character

Linea celebrates the use of colour for expressing individual style. We've expanded the colour palette of electrical accessories to give you more opportunities to invigorate your home interior themes. In addition to the base colours of white and black, we've developed three unique coverplate collections: Soft-Touch Brights, Soft-Touch Earths, and Metallics.

**“Colour evokes emotion and stimulates our senses by creating visual excitement. Even the smallest splash of colour can transform the look of a room.”**

Mix and match Linea coverplates and base colours to suit your own style. Be bold and go for contrast or keep it understated and harmonious. It's all about flexibility through colour - change colour as often as you like to suit your environment, just like a chameleon.

**With a super slim profile, all Linea products blend beautifully into wall surfaces and the unique Soft-Touch coverplates are simply a delight to touch with their beautiful suede-like feel.**

# FACTS ABOUT LINEA

**1** The Linea range encompasses all the switch plate needs for your home: light switches, powerpoints, dimmers, USB chargers, fan controllers, phone and data outlets, as well as free-to-air and pay TV outlets.

**2** Linea products consist of a grid and an easily changeable coverplate.

**3** Linea's base colours are: high gloss white and black.

**4** Coverplates are available to purchase separately. This enables you to easily update the look of your switch plates when you are redecorating, at minimal cost. Cover plates are available in the high gloss base colours, Linea's unique Soft-Touch Brights (p.5) and Soft-Touch Earths (p.13), as well as metallics (p.21).

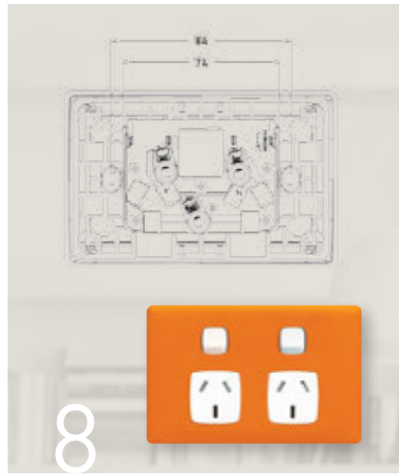

**5** With a sleek 4mm profile, Linea blends with surface areas for a more seamless, contemporary finish.

**6** Linea's Soft-Touch colours have a beautiful suede-like feel and have the added bonus of being fingerprint resistant.

**7** Removable coverplates make it easier to paint because you can remove the coverplates and paint liberally.

**8** Linea products use standard mounting which means an electrician can easily replace most old switches and powerpoints, without extra hole cutting or filling.
