

Getting the Most From Your Self Storage Space

- Plan your storage space.
- Place those items that you need to access often in the front of the unit.
- Leave a small space around the perimeter of your storage unit to aid circulation.
- Look Up! Utilise all of the space available to you, including the height up to a safe level.
- Stack the lighter boxes on top of the heavier boxes.
- Don't over-pack cartons or they will be too hard to lift.
- If tables won't disassemble, place a mat or protective plastic on the ground and lay the tabletop face down on the floor with the legs pointing up or make sure you use the space beneath the table top to store smaller items.
- Cover stuffed furniture with cardboard, blankets or plastic covers to protect against dust.
- Don't place heavy or sharp objects on top of upholstered furniture.
- Never lay paintings or mirrors flat. Ensure they are wrapped or placed in proper picture/mirror cartons.
- TO ENSURE SAFE STORAGE: Do not store anything COMBUSTIBLE (i.e. paint thinner, gasoline, solvents, paint, etc.).
- Do not store any living things (including plants), or perishable goods (especially foodstuffs).
- Empty petrol from mowers, whipper snippers, etc.
- Clean food crumbs from the back of sofas and lounge chairs – they attract rodents.
- Ensure gas bottles are empty and BBQ or cooking surfaces are clean.
