### BLOCKED DRAINS

#### How do I know if my drain is blocked?

Any abnormal smells or gurgling sounds are often the early signs of a drain blockage. Obviously if the toilet is slow to drain or the water level in the bowl changes, something is amiss and it's time to call us. These problems often show up as the washing machine or dishwasher finishes a cycle.

Best to get on to these problems as soon as possible.

#### There are many types of drains and many reasons for them to block;

- Tree roots often invade below ground sewer and storm water drains.
- Grease and fat can build up in drains usually from the kitchen.
- Hair and soap scum will block a shower, bath or basin.

Whatever type of blockage, whatever the fixture or appliance Taylor and Sons have the skill, knowledge and experience to resolve the issue quickly and efficiently.

Have a plumbing job or problem ?
