creating kewco history

Kewco Bathroom Products was established in 1954 by Keith Edward Walter in Adelaide with the support of his wife Carlien. A small fowl house was the beginning of today’s well established and successful business.

Later the first factory and showroom was established at Woodlands Terrace, Edwardstown, with 8 employees. Within a few years it was necessary for further expansion and Kewco was relocated to our current address on Brighton Road and employs over 40 South Australians.

Today, with Keith in his retirement, Kewco remains a family owned company managed by Keith’s son Grant and with his daughters also involved within the company along with long serving dedicated employees.

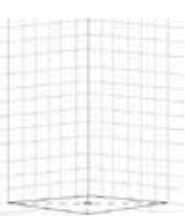

With commitment to design, manufacture, installation and service, Kewco has earnt an enviable reputation as one of the leading bathroom product specialists in South Australia.

planning and design

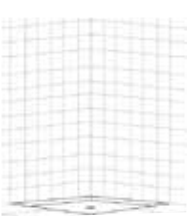

To assist with planning and design, we suggest a visit to our Somerton Park Showroom where there are over 13 bathroom displays to inspire you with ideas and information on transforming your existing bathroom, or creating a new one.

With over 60 years experience, Kewco Shower Screens have earned a reputation for quality, innovative design and attention to detail. This reputation has ensured that our products are the preferred choice of many local architects for South Australian elite hotel and apartment developments. The options for your showering area are:

flat floor

Ensure adequate fall to shower waste is achieved for good drainage on a flat floor.

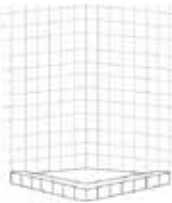

recessed floor

This is where tiles in the recess showering area are approximately 20mm lower than the main floor it’s the preferred manner for a tiled floor. You have the option to Install Shower Screens inside the recess eliminating any sill or installing shower screen on main floor.

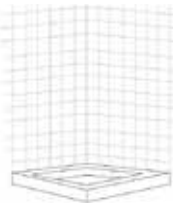

hob wall

Where there is a tiled hob, the shower screen sits on top of the hob.

shower base

When using a Shower Base, the shower screen is installed similar to a tiled hob wall. There are several standard size shower bases available.

We recommend a 20mm-25mm recess in the floor with a brass : Kewco to advise on whether GPO are to be removed. Kewco shower alcoves are available in a wide range of toughened glass and powdercoated frame finishes. Ask for a Free measure and Quote or your nearest distributor.

kewco ultima 10mm frameless shower

Ultima UF12 10mm Clear Toughened Glass with Chrome Hinges.

Elegance, clean lines and a look that is timeless, Kewco have combined today's technology, design and materials to create the ULTIMATE Shower Screen. Using 10mm or 12mm Clear Toughened Glass and European designed slim rolled or square edged hinges, we can design a screen to suit your individual needs.

Made from non-corrosive brass with stainless steel mechanisms, the hinges incorporate a unique spring tensioning system which allows the door to open in and out and self close to approximately 20 degrees. Ideally angles are at 180 degrees or 135 degrees but custom angle or placement door is available. A standard feature of our hinge is the buffer insert that protects the plating of the door hinge when pushed back onto itself.

Select from a large range of finishes including chrome, gold and satin chrome together with a large range of knobs and handles. Toughened glass is available in Clear, Bronze or Grey tint, etchina (acid etched), opti white (low iron, high quality ultra clear) or an obscured pattern.

Whether you choose wall channels or brackets, talk to your Kewco specialist to ensure the best option.

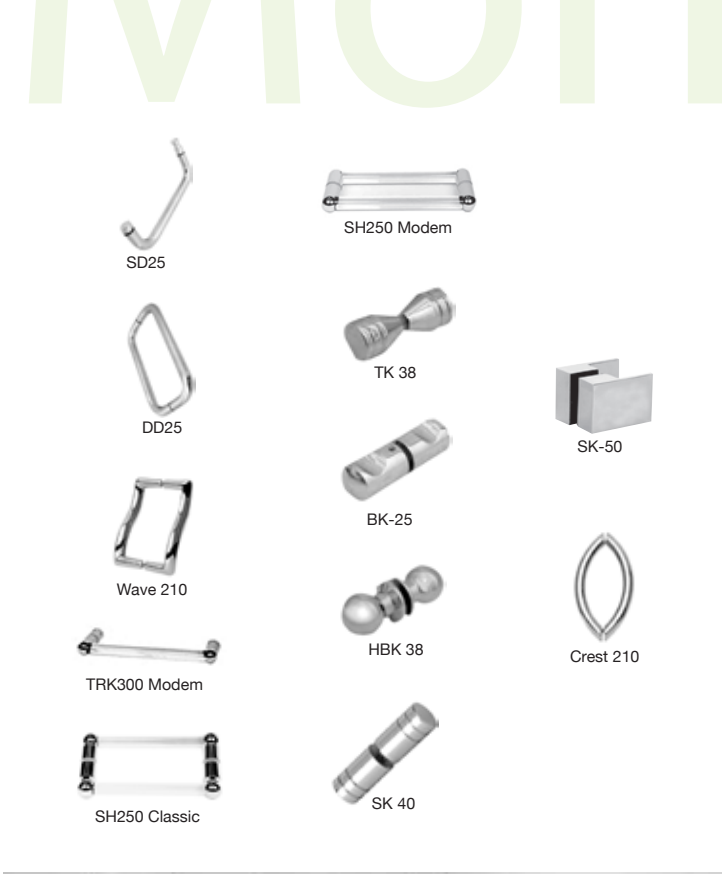

Ultima UF35 10mm Clear Toughened Glass with Chrome Hinges.

Ultima Fixed Shower Panel Bracket Fix

kewco monarch 6mm frameless shower

Monarch MF35 6mm Clear Toughened Glass with Chrome Hinges.

Monarch MF30 6mm Clear Toughened Glass with Chrome Hinges.

Monarch MF35 6mm Clear Toughened Glass with Chrome Hinges.

Monarch Hinges are made from non-rusting brass, stainless steel mechanisms and have a slim rolled or square edge.

A unique spring tensioning system which allows the door to open in and out and self close to approximately 20 degrees. Ideally angles are at 180 degrees or 135 degrees but custom angle or placement door is available. A standard feature of our hinge is the buffer insert that protects the plating of the door hinge when pushed back onto itself.

Like all our 6mm Frameless Screens, a glass header shelf support blends with the overall look whilst providing the extra support required.

The hinges are available in a wide range of architectural finishes including polished chrome, 24K gold plated and Satin chrome. Toughened glass is available in Clear, Bronze or Grey tint, etchina (acid etched), opti white (low iron, high quality ultra clear) or an obscured pattern.

## kewco mirage 6mm perimeter framed shower screen

Mirage M30 Clear Toughened Glass with Silver Trim.

Kewco Mirage designed specifically for use with 6mm toughened glass, has a unique pivot design that allows for a totally frameless door. Utilising a stainless steel pivot pin, the Mirage Shower Screen System features a positive close low friction design mechanism, providing the benefit of whisper-quiet and trouble free operation. The plated corner stakes finish off the look of this perimeter framed shower screen when set at 180 degrees or 135 degrees. Talk to your Kewco specialist if this cannot be achieved. The lowering effect of the design automatically reduces the gap between door and sill on door closure, which further assists with the minimisation of external splashing and improved water resistance. Produced from 6mm toughened glass framework available in White or Bright Silver with pivot blocks available in White, Gold or Chrome plate finishes. Toughened glass is available in Clear, Bronze or Grey tint, etchina (acid etched), opti white (low iron, high quality ultra clear) or an obscured pattern.

## kewco diamante bi-fold shower screen

Diamante D30 6mm Clear Toughened Glass with Chrome Hinges.

Kewco Diamante Shower Screen provides easy entry/ exit to the showering area offering a maximum opening space, making it an excellent choice for wheel chair or shower chair access.

The first panel swings through 180 degrees to second panel. There is a standard Bath Screen 1420mm high x 945mm wide (wall panel 549mm wide; articulated panel 390mm wide) or Kewco can manufacture to size for design and usage flexibility. Produced from 6mm toughened glass framework available in White or Bright Silver with hinges available in White, Gold or Chrome plate finishes. Toughened glass is available in Clear, Bronze or Grey tint, etchina (acid etched), opti white (low iron, high quality ultra clear) or an obscured pattern.

## kewco deluxe pivot shower door

Deluxe Pivot P35 White Cathlite Toughened Glass with Ivory Trim.

Beautifully designed, the Deluxe Pivot Door is an exclusive style to Kewco.

One of the main benefits of the Deluxe Door is that it gives you a wider opening than traditional pivot doors on the market.

By utilising a magnetic catch, together with a bottom splash guard, escape of shower water from the alcove is minimised.

The Deluxe Pivot Door pivots on a nylon pin system, which is guaranteed for 10 years.

Available in a wide range of toughened glass and anodised or powdercoated frame finishes.

Deluxe Pivot concealed nylon pivoting system.

Optional easy clean sill section.

Fitted inside recessed floor.

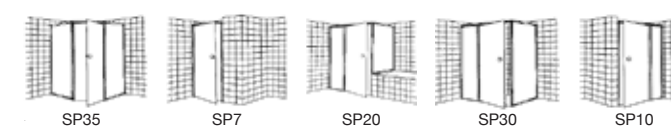

Deluxe Pivot P30 Clear Toughened Glass with Satin Silver Trim with optional easy clean sill.

## 900 series pivot shower door

900 Series SP35 Clear Toughened Glass with Silver Trim with optional easy clean sill.

An elegant look at an affordable price. The 900 Series offers a pivot door with reduced framework. A semi frameless toughened glass door ensures this shower screen is easy to keep clean. Heavy-duty aluminium section with aesthetically pleasing rounded corners will complement your bathroom décor.

Kewco's 900 Series Pivot Door has a nylon pivot system, in chrome white, ivory or black, ensuring greater strength and smooth operation and is guaranteed for 10 years.

Choose from a wide range of toughened glass and anodised or powdercoated frame finishes.

900 Series pivot shower with optional sill.

Fitted inside recessed floor.

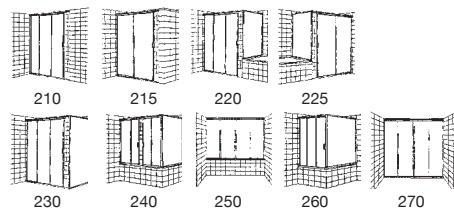

900 Series Pivot SP30. Clear Toughened Glass with Silver Trim with optional easy clean sill.

## kewco sliding shower door

Sliding Type 220 Bronze Clear Toughened Glass with Ivory Trim.

Kewco's innovative Sliding Door is arguably the most reliable and easy to clean, Shower Screen in today's market. A smooth gliding roller system guarantees that the doors do not jam, jump or drop out of the Head Track. Only Kewco Sliding Doors have a unique system which enables you to separate the doors for simpler cleaning.

Rounded corners and smooth heavy duty section with aluminium guides, concealed mitres with no plastic corner pieces, ensure Kewco Sliding Doors last the distance.

Kewco Sliding Doors are made to your requirements, with no bottom tracks or an easy clean sill. We recommend a 20mm-25mm recess in the floor with a brass angle, to eliminate the need for a bottom sill.

Kewco Shower Alcoves are available in a wide range of toughened glass and anodised or powdercoated frame finishes.

Sliding door can be fitted inside the shower recessed floor with no bottom track.

Optional easy clean sill section.

Sliding Type 230 Clear Toughened Glass with Silver Trim with optional easy clean sill.

Splashbacks

6mm Toughened Glass Splashback • Easy to Clean • Strong and Durable • Huge range of colours

Kewco Glass Splashbacks offer a pristine look that will enhance any kitchen. Imagine having no grout where bacteria can form. The low maintenance easy to clean splashbacks have flat polished edges and they are waterproof, high impact, heat resistant and come in an endless choice of colours including metallic (ask for the latest colour chart). We use either clear or low iron 6mm toughened glass for safety and to comply with Australian Standards. Clear glass when painted will give off a soft aqua colour. Low Iron Glass is a high quality ultra clear glass and highlights any colour in its natural colour scheme, increasing the colour depth with its glossy surface.

A quote can be given for your splashbacks from your kitchen plan and measurements will be taken once all your bench tops are in place. Come into our showroom or contact our friendly sales team for more information.

Ultracoat Glass Splashbacks for the very latest technology in coating.

Recommended Surface Preparation

Client Responsibilities

- Surface should be clean and dry. If the surface is plastered or rendered brick ensure the wall is completely dry and sealed, using either a sealed MDF backing board or suitable paint finish.
- When choosing ULTRACOAT splashback, it is recommended that a white paint finish be applied to the base surface as an undercoat when using light colours.
- Make sure surface is true and plumb, with maximum dimensional tolerances of + or – 2mm.
- Ensure all power points are located in accordance with our cutting and shape limitations.

Electrical – General Power Outlets (GPO)

Kewco is not licensed to remove or replace general power outlets. The customer should be aware that where power points or light switches are unfastened from a wall or disconnected during installation, a certificate of compliance should be issued by the relevant subcontractor.

Kewco to advise on whether GPO are to be removed.

Installation

Installer’s Responsibilities

- Toughened glass should be installed in accordance with Australian Standard AS 1288
- When measuring and installing ULTRACOAT splashbacks, consideration must be given to manufacturing tolerances.

Colour Selection

Standard Colours

Black, Bright Blue, Claret, Graphite Grey, Inca Gold, Magnolia, Neutral Grey, Off White, Pale Blue, Raffia, shamrock, Sky-Blue, Smoke Blue and White.

Metallic Colours

Bright Silver, Blue, Claret, Golden Sand, Pewter and Silver Grey.

Colours shown in the Orica Guide to Australian Standard Colours, and in the Dulux Quantum FX colour chart are as close as possible to the actual colour of the paint.

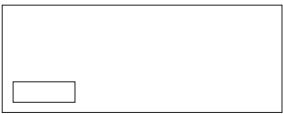

Colours produced on glass samples are representative only.

\* Any Paint colour can be matched provided paint brochure is provided.

Cutting and Shape Limitations

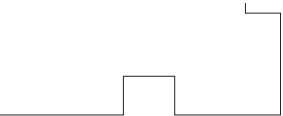

Two or three way split maybe required with silicon butt joints denoted by broken line. A 3mm space is required around perimeter of glass and any silicone butt joints. To ensure no joints then A = ½ B max.

All center power point notches require a minimum of 35mm from any glass edge.

Kewco to advise on whether GPO are to be removed.

All corner and side notches will require a minimum internal radius corner of 8mm.

Cleaning Recommendations

ULTRACOAT splashbacks should be kept clean of surface build up. General household cleaners recommended for glass are suitable as cleaning agents. Sponges, chamois and cloths may be used, but must be rinsed regularly to remove all foreign particles that could scratch the glass surface. Products like steel wool and scourer pads must never be used as they may scratch the surface.
