

Full Car Service

Behind the trusted Repco Authorised Service sign is a local, independently-owned garage. Fully backed by Repco, our service centres and qualified mechanics look after you and your car by providing a full range of expert car servicing and repairs.

- All mechanical repairs and car service on most makes and models by fully qualified mechanic.
- [New Car Servicing](#) and [Fleet Management Solutions](#).
- Repco Auto-Tech trained automotive technicians who are fully updated on all new car models with service bulletins and regular workshop clinics.
- Repco Authorised Service [Nationwide Warranty](#) for 12 months or 20,000 km's on all work performed.

You can rely on the full range of car services available through a Repco Authorised Service mechanic, including;

Exhausts ...

Auto-Tech trained mechanics inspect the exhaust system for leaks, damage and deterioration. Replacements with quality mufflers and components where required.

Air Conditioning ...

System inspected by qualified mechanics, including checking for operating pressures, leaks, deterioration or damage to any hoses, seals or components. Drive belt tension is also checked and the system properly recharged with refrigerant.

Fuel System & EFI ...

Fuel System Service by a Repco Authorised mechanic includes full engine tune-up, fuel injector cleaning to ensure smooth running, air intake system and fuel line inspection, fuel filter and air cleaner checked and renewed if necessary, full grease and oil change and a full safety inspection and report.

Engine Repairs ...

Repco Authorised mechanics can handle minor and major engine repairs. Our service centres can also supply and fit exchange engines. Alternatively, engines can be rebuilt where no replacement unit is available.

If your engine is worn and requires major mechanical work, a reconditioned replacement engine can restore power and economy to your vehicle.

Your local Repco Authorised Service Centre can also arrange, supply and fit quality HM remanufactured engines for most makes and models. HM engines are remanufactured to the highest quality in automotive engineering.

All exchange engines are fully guaranteed for quality and performance. Engines will be rebuilt where a replacement unit is unavailable for your vehicle. Ask your local Repco Authorised mechanic which options best suit you and your situation.

Wheel alignment ...

Repco Authorised mechanics use the latest precision equipment to adjust caster, camber and toe-in of front wheels to prevent excessive tyre wear and high-speed instability.

Car Servicing ...

Major car service includes grease and oil change, precision Auto-Tech diagnostic tune-up and safety inspection and a report on your cars' overall mechanical condition. Servicing your car at regular intervals helps prolong the lifespan of your vehicle, reduce running costs and maintain safety. It is best carried out by a properly qualified mechanic.

Cooling system ...

Our expert mechanics pressure-test the radiator, inspect hoses for leaks and radiator cap for proper sealing. Coolant is checked for proper levels, water pump for leaks or wear and all drive belts for tension and condition.

Clutch Repairs ...

Full clutch service including adjustment, hydraulics and clutch pad replacement for all makes and models by an Auto-Tech trained mechanic.

Suspension ...

A Repco Authorised mechanic tests and inspects all suspension components for wear, including ball joints, shock absorbers, control arms, bushes and McPherson struts*. (**Any parts required cost extra*).

Transmission ...

Automatic Transmission Service by our skilled mechanics includes replacement of transmission fluid, cleaning and/or replacement of filter plus any adjustments as necessary.

Rear Axle ...

Fluid level in differential checked by qualified mechanics. Universal joint and centre bearing checked for free play and replaced if necessary.
