

The statistics prove it.
Protex Brake Pads perform when it counts!

Ultra

Ultra performance, ultra quiet and ultra clean. You can fit **Protex Ultra** Disc Pads safe in the knowledge you are fitting a premium disc pad which will stop a vehicle effectively while delivering durability and quiet operation. The manufacturing process utilises the advanced friction technology of positive mold, this ensures consistent compressibility and results in quiet operation and greater pad life. Protex Ultra friction material remains stable under a wide range of temperatures ensuring consistent superior performance.

- Contains ceramic and copper fibres which are proven to dissipate heat
- Minimises rotor wear
– a primary cause of wheel dust
- Reduced pad vibration
– a leading cause of squeal
- Performs well at all temperatures
- Superior performance
- Suitable for everyday driving

4x4 Endurance

Designed and manufactured with the goal of meeting the challenge of effectively stopping 4WD vehicles, **Protex 4x4 Endurance** brake pads are a certainty. Extensive testing in all conditions and the harshest terrains has produced only positive results. Innovative technology specifically matches each vehicle to its most compatible friction material, ensuring reliable braking performance.

- Shimmed to reduce noise
- Prolonged pad life
- Effective braking even at high temperatures
- Excellent fade resistance
- Suitable for city, rural, towing and intrepid off-road driving

Blue

Standard

Affordably priced and extensively ranged, **Protex Standard** Disc Brake Pads deliver exceptional stopping power with minimal dust, noise and disc rotor wear. Suited to most driving styles, Protex Standard offer proven reliability for Australian drivers.

- High on reliability and value
- Suitable for all types of braking
- Smooth quiet braking
- Sure stopping power
- Good pedal feel
- Meets European Regulations

Protex Blue is formulated from quality non-asbestos materials to provide extended life and fade resistance. Designed for general use and economically priced, it is most suited to every day suburban driving and city commuting. The Protex Blue range delivers smooth and reliable braking performance in regular driving conditions.

- Excellent value for money
- Suitable for light to moderate braking
- Shimmed to reduce noise
- Low dust and low noise
- Good stopping power

The innovative technology of **Protex Plus** uses steel strands within a non-asbestos, metallic brake-pad to provide strength and conduct heat away from rotors. Specifically designed for heavy duty applications, the **Protex Plus** range is ideal for front wheel drives, utilities and light commercial vehicles. No matter what the vehicle Protex Plus delivers smooth braking performance, reduces brake dust and minimises fade and squeal.

- Designed for heavy duty applications
- Suitable for moderate to heavy braking and towing
- Extensive Australian, American, Japanese and European references
- Long-lasting semi-metallic technology
- Excellent fade resistance

Plus

PROTEX

The standard in auto parts

Protex Disc Brake Pads offer:

- Exceptional stopping power
- High FF friction rating
- Good pedal feel
- Quiet operation
- Low dust emission

The Protex Disc Brake range includes:

Blue

Value for money

Standard

Proven reliability

Plus

Heavy duty, extensive American range

4x4 Endurance

Proven all-terrain performance

Protex Disc Brake Pads
Premium Braking Performance

PROTEX

The standard in auto parts

There's a Protex Disc Brake Pad for every car.

A leading brand in Australia for over ten years, Protex offers the single largest range of brake and clutch components available in the country today.

Formulated to meet the specific quality, fit and performance requirements of modern passenger vehicles, Protex Disc Brake Pads are available for virtually every Australian, Japanese and European car built since 1990. And, to ensure peace of mind for drivers and brake-fitters alike, all Protex Disc Brake Pads are covered by a **12 month/20,000km Warranty**.

Whatever type of car, whatever type of driving you do, there's a Protex Disc Brake Pad to suit your needs and your budget.
