

## **Press Release**

### **New Portable Biogas & Syngas Analyser**

The new MCA Syn 100P series of portable gas analysers manufactured by ETG are now available from Anri Instruments & Controls Pty. Ltd.

The MCA Syn 100P is the ideal solution for the measurement & analysis of Biogas & Syngas processes measuring CH<sub>4</sub>, CO<sub>2</sub> & CO levels by NDIR technology, H<sub>2</sub> by TCD principle & O<sub>2</sub> by electrochemical type gas sensor.

The analyzer is mounted inside an impact resistant hard case with trolley type wheels & handles & to IP67 protection.

Each unit includes a large touch screen display, inbuilt sample pump, sample filtration, data logging capable of recording up to a 1000 data sets, remote diagnostics & user calibration facility..

For wet & dirty samples a Portable gas conditioning system is available.

The MCA Syn 100P is the ideal unit for those operators who need to monitor & log the composition of the syngas at different locations. Like the Biogas version MCA 100 Bio each unit has remote access to PC, tablet or smartphone.

Fixed systems are also available.
