

SUNBOSS®

ROLLER BLINDS

 **TURNILS®**

With a focus on innovation, design, functionality and style, the Sunboss® Roller Blind system delivers smooth and reliable operation perfect for all interior applications.

WHY CHOOSE SUNBOSS ROLLER BLINDS

FEATURES & BENEFITS

SLEEK FINISH

All Sunboss componentry is designed to provide a high-quality sleek finish for all blinds without the complexity and inventory load of other systems.

SMOOTH & QUIET

All operating options are designed for effortless and super-quiet movement.

ROBUST RELIABILITY

Specifically engineered aluminium tubes provide core strength offering minimal deflection and large expanses.

VERSATILE DESIGN

Create a customised system to suit your light control and privacy needs in a style that fits your space.

CHILD SAFE SOLUTIONS

Innovative chain-free operating systems, such as ZeroGravity® or Motorised, offer the ultimate child safe solutions.

AUTOMATION COMPATIBILITY

Partnered with Motolux Motorisation. Offering solutions for App control through the Smart Controller for affordable home automation.

Roller Blind Systems

STANDARD

ROLLER BLIND SYSTEMS

Standard roller blinds are available in all operating options. Customise with your choice of control side, face or reveal fit and either standard or reverse roll depending on your fabric selection and light control needs. You can choose from 38mm, 50mm and 63mm tubes.

75mm Square Fascia

SINGLE FASCIA

ROLLER BLIND SYSTEMS

The Single Fascia is available in square and curved profiles.

The SunBoss 75mm Single square fascia is stylish and sleek. The Inverted positioning allows for front or back roll making it fully versatile.

The 100mm Decora (curved) fascia provides a simple, modern and elegant cover to conceal roller blinds that are face or recess mounted.

Decora Fascia

100mm Square Fascia

LINKED

ROLLER BLIND SYSTEMS

Link up to 4 blinds to cover wide expanses or multiple windows with singular control. Corners and bay windows are covered using a universal joint coupling mechanism. An independent linking option is also available allowing for each blind to still be operated separately. The multilink system can be used with any tube size from 38mm to 63mm, using standard tube adapters.

MEGA SYSTEM

ROLLER BLIND SYSTEMS

The Sunboss Mega system is designed for large single and double roller blinds using a bigger diameter tube. It works with a wide range of lift operations including Chain Drive and Motorised.

DUAL

ROLLER BLIND SYSTEMS

Offering the most versatile light control, dual rollers allow you to select two different fabrics for installation on a compact bracket in face or reveal fit. Choose from a standard bracket for light minimisation or reverse bracket to achieve a self-pelmet effect. Dual rollers are available in chain, ZeroGravity or motorised operating options.

DUAL FASCIA

Available in White, Black, Cream or Anodised the dual fascia is the perfect addition to neatly cover dual roller blinds in either face or reveal fit. This maintains a designer look across the entire room decor.

Featuring a front fascia panel with top, the specially designed brackets clip into place for easy installation with complementing endcap colours completing the look.

HEADBOX CASSETTE

ROLLER BLIND SYSTEMS

Featuring a slimline and contemporary design, the system is available in a headbox for longer window drops.

The headbox conceals the roll and brackets and can be easily installed in any position, partnering with side channels and bottom channel for a complete blackout solution.

This option is available in three colours: White, Black and Anodised, with colour coordinated endcaps, complementing a wide variety of fabrics.

SUNBOSS ROLLER BLIND SYSTEM OPTIONS

Operating Options

Operating Options

Select from Chain, ZeroGravity or Motorised - each providing an increased level of ease and boasting superior functionality and contemporary style.

CHAIN

Standard or Metal options available.

ZEROGRAVITY

Raise and lower by gently moving the bottom rail.
Great choice for child & pet safety.

MOTORISED

Effortless remote control automation.
Great choice for child & pet safety.

CHAIN OPERATION

OPERATING OPTIONS

Sunboss chain operating options are designed with an unobtrusive curvature across all drives for a sleek aesthetic.

Chains are available in plastic, or metal in a variety of loop lengths.

A specially designed chain drive dampens chain noise, providing a smooth and quiet operation.

HEAVY DUTY

Chain operated solution available for heavy duty single blinds on the 63mm tube eliminating the need for motorisation.

Available in white or black with metal covers.

Chain tensioners provide the perfect child safety solution for chain drive systems.

ZEROGRAVITY OPERATION

OPERATING OPTIONS

CHILD SAFETY[^]

ZeroGravity is a completely chain free roller blind system providing ultimate child and pet safety.

OPTIONAL HANDLE

Optional operating handle is available in black, white and anodised colour options (this is only available with the Ellipse Rail and not Flat Deluxe), providing a centered lifting point further reducing fabric tracking and additional grip for reveal fit blinds.

UNIVERSAL COMPONENTRY

The ZeroGravity system uses the Sunboss 37mm 43mm and 50mm tube and standard componentry for a cohesive look across all options. ZeroGravity can be used for both standard and reverse roll applications.

CLEAN INTERIOR AESTHETIC

The chain free system provides a clean and tidy interior look with no fixing of chain tensioners required.

* All Turnils products that are installed correctly will comply with the Trade Practices Act (Consumer Product Safety Standard – Corded Internal Window Coverings) Amendment Regulations 2010 (No. 1)

REDUCED LIGHT GAPS

The elimination of a chain drive allows the Sunboss ZeroGravity system to have extremely small light gaps of approximately 10mm. The light gaps are evenly balanced for minimal light intrusion in the reveal.

SIMPLE & EASY OPERATION

The patented spring system features smooth granular control for precise operation. The roller blind can be raised or lowered to any desired position using the bottom rail, without the need for complex release mechanisms.

Motorisation

Powerful yet quiet motors for home automation

Motolux motors have a versatile and adaptable design, which means they can be seamlessly incorporated into a vast range of curtains, shades and blinds. They are also quiet, seamless in operation, and backed by a five-year warranty* – for ultimate peace of mind.

MOTOLUX OPERATION

MOTORISATION

Motolux offers both smart affordable motorisation solutions available with lithium rechargeable battery and hardwired (240V) motor options with a variety of control options.

HAND HELD REMOTE

A rechargeable remote-controlled option for 240v AC or lithium rechargeable motors, single or linked blinds. Motolux Remote is also compatible with Smart Controller.

MOTOLUX MOTORS

Powered by AC and DC motors from 1Nm up to a powerful 6Nm. Partners with leading home automation brands.

RECHARGEABLE

Featuring low DC voltage, no electrician is required to install.

The Motolux Rechargeable Motor provides 6-8 months of average usage before a recharge is required and is compatible with Smart Controller.

3 SIMPLE SETUP STEPS:

1. Plug in the Motolux smart HUB.
2. Download SmartLife App and create an account.
3. Pair the device then connect & operate the entire remote Motolux motors range from any location.

Full setup details available with device.

MOTOLUX SMART HUB

MOTORISATION

Centralise and simplify your home with the Motolux smart HUB, the tiny and talented home automation hub compatible with Motolux remote control motors.

The Motolux RF Hub has a built-in RF transmitter which can control various devices for most TVs, air conditioners and other remote-controlled devices around your home.

Create up to 25 custom schedules & scenes.

Easy one-touch app control allowing you to operate from your smartphone anywhere in the world.

Control roller blinds via an easy to use app on your smart phone or partner with [Amazon® Alexa®](#), [Google® Assistant](#) or [Control4™](#) systems for a fully integrated solution.

Controls all Motolux remote motors including internal roller blinds and external awnings.

A modern, minimalist interior space featuring a kitchen island with a marble countertop and a large window with Sunboss roller blinds. The kitchen island has a marble countertop and a stainless steel faucet. On the counter, there is a coffee machine, a small book titled 'FLAVOUR', and a small decorative object. Three bar stools with wooden tops and black metal frames are positioned under the island. The floor is made of dark wood planks in a herringbone pattern. The large window on the right side of the image is covered with light-colored roller blinds. The window looks out onto a balcony with a table and chairs, and a view of a city and greenery. The word 'Hardware' is written in large black letters on the right side of the window.

Hardware

BOTTOM RAIL FOR SUNBOSS ROLLER BLINDS

HARDWARE

SOUND ABSORBING INSERT

The Ellipse Ultra Plus bottom rail features a rubber insert cleverly hidden on the back of the rail which helps to absorb any sound of the rail bumping against the window.

The Ellipse Ultra bottom rail has been engineered for performance and style, offering a contemporary finish for Sunboss Roller Blinds[^].

[^] Not compatible with Sunboss Mega System with Cable Guide or with Side Channels.

PERFECTLY BALANCED

The internal design allows for even weight distribution so that the rail and fabric hang perfectly at the window.

ERGONOMIC DESIGN

The curved design not only looks good but fits naturally in the hand for comfortable control with the ZeroGravity operating option.

WIDE COLOUR RANGE

Features eight colours with matching end caps, to coordinate with any fabric for a stylish and seamless look.

FLAT DELUXE BOTTOM RAIL

The square design is a contemporary look for modern homes.

Flat Deluxe Bottom Rail
