FACILITIES MANAGEMENT

Sanitary Disposal Service

Our Sanitary Disposal Unit is specially designed for use inside the ladies toilet cubicle and is slim enough to fit neatly alongside the toilet without causing any inconvenience.

All sanitary bins are exchanged for new each service, and thoroughly cleaned off-site by trained staff. Many of our competitors now clean the bins on site - a dangerous and unsanitary practice.

A JWN Sanitary Disposal Unit contains extra strong granules, so as sanitary towels and tampons are dropped into the bin, they are enveloped in a powerful sterilising vapour, which destroys infectious germs and eliminates unpleasant odours.

JWN's sanitary disposal service will eliminate expensive plumbing repairs caused by clogged drains and toilet bowls

- Slimline unit to fit neatly alongside the toilet
- Contains extra strong granules that kill bacteria
- Entire unit is exchanged and sanitised at each service
- Regular exchange service
- Practical, durable and user friendly
