

nokian TYRES

Aquaplaning Indicator

When only 4mm of tread depth is remaining the tread's drop symbol will disappear warning the driver of increased risk of aquaplaning.

Polished Grooves

Snow, slush and water flow efficiently off the polished grooves under the tyre preventing aquaplaning.

Low Rolling Resistance

The easier the tyre rolls, the less fuel it consumes and the fewer CO₂ emissions it generates. A 40% difference in rolling resistance means approx. a 6% difference in fuel consumption.

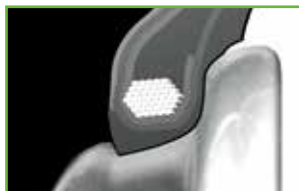

**nokian
TYRES**

Information Field

This area allows for recording the correct inflation pressure and installation location during tyre change.

Mud Stopper

Prevents sand and mud from getting caught between the rim and the tyre and extends the service life of the tyre and rim.

Naturally Nokian Tyres

Nokian Tyres was the world's first tyre manufacturer to switch to using purified, low aromatic oils throughout its production.

A unique offer for Australian drivers

Buy 4 selected Nokian tyres and if you are not 100% satisfied with them, return them and **get your money back, guaranteed.**

*Conditions apply. See in-store for more details.

NOKIAN TYRE RANGE

CAR, 4WD/SUV, VAN &
LIGHT COMMERCIAL VEHICLES

nokiantyresaustralia.com

Printed March 2015

PASSENGER CAR TYRES

nokian TYRES **Z G2**

Available for **16" - 18"** wheels
European "tyre test winner"

nokian COOL **SILICA**

The cool performer

Designed for fast driving, Nokian Z G2 clearly outperforms its competitors in demanding, difficult conditions. The tyre enhances driving stability, especially on corners and when changing lanes. The Nokian Cool Zone concept improves driving stability, handling, wet grip and durability, reduces the tyre's noise level, rolling resistance and heat generation.

- Stable, precise and quiet
- Retains its driving properties in extreme situations
- Excellent wet grip at all temperatures

nokian TYRES **V**

Available for **15" - 17"** wheels
European "tyre test winner"

nokian COOL **SILICA**

For those who demand grip and durability

Hot Australian summers place heavy demands on tyres. Nokian V tyres, optimised for their own speed categories provide excellent aquaplaning properties. The tread geometry's narrow, oriented grooves and water guides remove water efficiently from the contact surface. The noise cavities in the longitudinal grooves affect air flow and reduce driving noise.

- Tailored for demanding conditions
- Stable driving behaviour even at high speeds
- Excellent aquaplaning properties

4WD/SUV TYRES

nokian TYRES **Z SUV**

Available for **18" - 19"** wheels

nokian COOL **SILICA**

Easy rolling superiority

The Z SUV is exceptionally consistent to drive, rolls easily and is still extremely strong. The SUV tyre, designed for high speed, as well as a stylish exterior, offers a host of innovations which improve driving stability in extreme conditions. The tyre stays cool and responds to the driver's wishes immediately on all road surfaces.

- Tailor-made durability for SUVs
- Excellent grip even in extreme conditions
- Efficient power

nokian TYRES **HT SUV**

Available for **16" - 18"** wheels

nokian COOL **SILICA**

Durable SUV tyre for the rough road

Nokian HT SUV is exceptionally hard wearing and strong but still reacts immediately and accurately to steering. Although the tyre is at its best on asphalt, it also functions excellently off the main roads, covered in sand and gravel. Following our principles of durable safety, the tyre properties are consistent throughout its working life.

- Durable construction for a long lifetime
- Precise and sturdy road response
- Good grip on both wet and dry roads across all temperatures

4WD/SUV TYRES

nokian TYRES **ROTIIVA AT**

Available for **15" - 17"** wheels

Firm durability

The Rotiiva AT (all terrain) gives excellent performance on asphalt and gravel, but also in easy off-road conditions. Its unique tread design provides good self-cleaning properties and stable driving in various conditions. Strong construction and a tailor-made cut-resistant tread compound gives excellent durability, even for heavier cars in demanding conditions.

- New aggressive tread design
- Very strong construction
- New cut resistant tread compound

VAN/LIGHT TRUCK TYRES

nokian TYRES **cLINE VAN**

Available for **16"** wheels

Works on the road

The new Nokian cLine van tyre, designed for delivery trucks and vans, offers stability, durability and safety for demanding professional use. The Van is intended for lighter loads and passenger transport. The safety of these tyres is maximised by a new rubber compound, the Clinch rubber compound that offers excellent durability and wet grip.

- Resists wear and maintains its good properties for longer
- Stable and comfortable to drive even at heavy loads
- Excellent wet grip and handling
