CONTACT US (CONTACT-US.PHP)

Now the leading provider of mobile patrol services in the greater Wagga area, G-TEC services clients across Wagga Wagga, Cootamundra and surrounding areas. Our growth is the result of our use of GPS and data recording technology. We monitor the performance of our staff daily to ensure our patrol targets are met. The old days of patrol companies just filling out a run sheet are over. Our professional, dedicated staff are out there every night, protecting our clients' businesses, and we can prove it through the use of GPS tracking and Uniguard patrol tracking technology.

We generally provide between one and three patrols a night, however, we are happy to discuss your particular needs and tailor a package to suit.

The standard approach is an initial lock-up patrol of a site, followed by one or two more checks to promote a presence of activity around the site to deter potential

intruders, and to ensure no attempts have been made to damage or enter a premises.

Intermittent mobile patrols are a cost-effective way to protect your home or business, without resorting to full-time static guard services. When we arrive at your business to perform a patrol, we are a visible presence, creating activity around your site, so observers, whether casual or motivated, think twice about targeting your property. Mobile patrols are a proven method of external security. Alarm systems are a critical element of a total security plan, but ultimately, they only inform you that your property has already been broken into or tampered with. Patrols protect your premises from the outside, by providing a visible presence and deterrent.

We are a professional provider, passionate about employing effective security protocols. We structure our checks randomly, not falling into predictable patterns. We train our staff to focus on details and to be aware of observers. We work closely with the Police and assist the community by providing extra eyes and ears while we are performing patrols.

We can service any request, whether it is a checking a one-door shop front, or locking up a large industrial site.
