

Rapid: Crushing & Screening

New specialist contractor for building tailings dams

Mining companies needing mine site tailings dams or site construction work have a new specialist to call on in Rapid Dams.

Rapid Dam Contractors Pty Ltd recently commenced operations as a division of Rapid Crushing & Screening Contractors.

The new business is headed by Martin Fowler and Mark Bowman who bring with them a huge level of expertise in mine site civil construction works .

Rapid Dams offers services in building wet and dry lift tailings storage facilities, plus clay and HDPE and PVC lined ponds built to any size, dam extensions, the raising of embankments, road construction, drainage and rehabilitation earthworks.

Martin and Mark are among the best known experts in this field of mine site work, as they've been involved in tailing dams projects throughout W.A. for more than 20 years.

By having the strength of Rapid Crushing they gain immediate access to a massive array of earthmoving equipment and capabilities of providing an Australia wide service.

Rapid's Managing Director, Neil Irvine said this was a logical extension for Rapid Crushing & Screening and the two businesses have synergies that will create opportunities for both businesses and offer an extended range of services to our expanding client base Australia wide.

Rapid Dam's contacts: Martin Fowler 0437 316 727 or Mark Bowman 0437 864 033.
