LUXAFLEX® WINDOW FASHIONS

My life with LUXAFLEX® Window Fashions

The stunning range of LUXAFLEX® Fabrics makes choosing a window fashion easy.

LUXAFLEX® has one of the most extensive fabric ranges in Window Fashions, with over 300 fabrics to choose from. This brochure will assist you in selecting the perfect fabric and colour to create your sense of style.

Colours help establish the mood and feel of a room, and when used correctly can create a lasting impression. Using neutrals or lighter colours will give an impression of spaciousness; where as darker colours can make a big room feel more intimate. Warmer colours have the ability make a room more cheerful whilst cool colours are more relaxing and create a soothing environment. Consider the effect that you are trying to achieve before choosing your window fashions colour scheme.

Choosing the right texture or pattern can often be as important as the colour selected. The texture and pattern of the fabric can create interest and variety to a room which will add depth and contrast. The texture can be smooth, rough, soft, velvety, silky or lustrous. Patterns can add character and flair to an interior without overpowering the existing décor. The diverse range of LUXAFLEX® fabrics includes a range of textures and patterns in different opacities designed to perfectly suit any space.

Control Light & Privacy

One of the most crucial and adjustable elements in creating the perfect atmosphere in your home is light. Where windows provide light, there is always a need to control it using quality LUXAFLEX® Window Fashions.

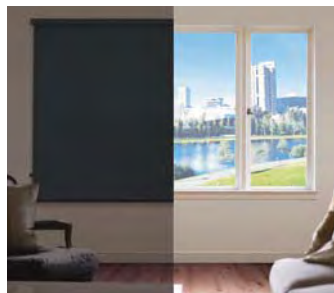

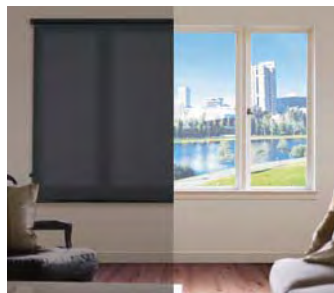

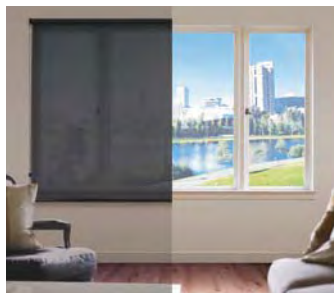

To achieve internal privacy, LUXAFLEX® Window Fashions offer a complete range of fabrics that provide various levels of opacities. Select from a Sunscreen, Sheer, Translucent or Blockout fabric to control light and privacy that suits your needs.

Sunscreen fabrics allow for the control of heat and light whilst maintaining your view. Both technically and aesthetically unique with their subtle design, Sunscreens are perfect for any room heavily exposed to the sun to reduce glare and heat.

Sheer fabrics give daytime privacy but no privacy at night when all the lights are on inside the room. Sheer and translucent fabrics are often layered with blackout fabrics to give full privacy for day and night.

Translucent fabrics screen out harsh light and bring texture or pattern to light coming into a room while providing daytime privacy. Translucent fabrics provide mid level range of solar optical and energy comfort within the home.

Blockout fabrics offer the ultimate level of privacy, day and night whilst helping to insulate the room. By adjusting the blind to suit your lighting requirements, blackout fabrics offer room darkening capabilities which are optimal for rooms where light control is paramount.

MULTIVISION® Fabric Palettes

MULTIVISION® Fabric Palettes assist you in keeping a uniformed colour scheme throughout your home. The Palettes group fabrics together that are the same colour tone, but have different opacities allowing you to easily select the matching Sunscreen, Sheer, Translucent or Blockout fabric to create the light, privacy & comfort you require for the room.
