

Treasuring your freedom

The New Yale
Safe Collection

The world's favourite lock

Yale

The world's favourite lock

At Yale we've been looking after people's homes and their favourite things for over two hundred years. We understand that the truest form of security is the freedom to enjoy living life to the full, without worry.

The New Yale Safe Collection has been designed to provide just that. As one of the world's best known, and preferred, leading lock brands we follow our mission to help consumers live more carefree lives. So we have combined the latest technologies and materials with new research and centuries of experience to create a range that meets the most demanding requirements.

Thoughtful design features include an interior light that comes on when you open the door, for easy viewing, and a felt lining to protect your belongings.

Peace of mind in a box

The New Yale Safe Collection is designed to be even stronger, more durable and easier-to-use. It's also designed to be good-looking; just because you've put your safe in the wardrobe doesn't mean you want to be sighing every time you open the door!

Keeping passports, birth certificates, deeds, cards, cash and keys in a safe makes them easier for you to find, but not for thieves. For those concerned about identity-theft, it's good to know a safe can play a positive part in keeping your life your own, while leaving you worry-free enough to enjoy it.

Finally, a safe makes the ideal place for the irreplaceable (those diaries, old letters, or grandmother's earrings) – and a perfect hideyhole for items whose value is inexpressible, such as the last few month's work on your laptop.

Our Yale Certified Safes provide a range of security and size options to suit different needs.

Safe features

The design scene: fitting into fashionable homes

Research (*ASE, Consumer Research, July 2007, UK*) shows that people want safes of a handy size. This is especially important for the growing numbers of individuals living in smaller, homes, where space is at a premium. Research also shows that where possible, most people prefer their safes to be bolted to the floor. All our safes take this fact into account. All are fully-lined to futher protect their contents. Because safes are most often hidden in dark corners, we've also included a more intuitive LCD screen that lights up when entering your PIN, and a bright interior light that comes on when you open the door.

Additional Features

- extra thick body and door, reinforced with armour plated steel
- laser cut door, for minimal gap
- heavy-duty solid steel locking bolts
- reinforced door hinge

As a result the new Yale certified safes were awarded a Silver in the 'Sold Secure Accreditation'
(Sold Secure, UK, 2009).

Safes Range Matrix

Product	Model N°	Exterior dimensions			Interior dimensions			Net weight (Kg)	Gross weight (Kg)	Keys	Light source	Interior finish	Batteries included	Armour Plating
