## PME Spinmaster

Like 13

The PME Spinmaster is recognised, worldwide, as one of the best spinner knobs available. It was a revolutionary design when it was launched over a decade ago, and the combination of reliability and ease of use ensures that it remains a class-leading product.

The world renowned PME Spinmaster spinner knob

### Gallery

The world renowned PME Spinmaster spinner knob is designed and engineered by us. It is a simple

solid as a rock, smooth as silk

This device enables smooth, comfortable one-handed use of the steering wheel. It is perfect for anyone with impaired hand function, or who needs to operate other driving controls with the other hand.

The PME Spinmaster can also be fitted with:

- The PME Easyspin wireless control module: This enables the steering hand to also control secondary functions like indicators (self-canceling), headlights and horn.
- Other orthopaedic fittings: The knob can be replaced by a variety of handles to suit different physical limitations.

### Patented features

The PME Spinmaster features a quick release system allowing for fast, easy removal and interchange of the spinner knob with our orthopedic devices. The simple push button release mechanism can be operated with one hand without difficulty.
