

Southbound Locksmiths: Automotive Solutions

Southbound Locksmiths offer a range of automotive locksmith services for cars, motorcycles, 4WD's, commercial vans, trucks, forklifts, tractors, vintage vehicles and more.

If your car was manufactured after 1995 and your key has a plastic head it is more than likely that it has a computer chip embedded in it. If so, having a spare key could possibly save you thousands of dollars to have new keys made to your car if your only key is lost.

Our automotive services include:

- ✦ Ignition locks repaired or replaced
- ✦ Vehicles opened when keys locked inside
- ✦ Keys made to vehicles on site
- ✦ Transponder keys made and programmed
- ✦ Locks rekeyed to stop old keys working when keys are lost or stolen
- ✦ New ignition, door and boot locks supplied & installed to suit your existing key
- ✦ Worn & damaged keys re-cut to factory code
- ✦ Vintage vehicle locks reconditioned, rekeyed & keys made
- ✦ Pensioner and RAA member discounts
