

Frequently Asked Questions

Before committing to your new kitchen or vanity, it is understandable that you may have some questions. Below are some of the things that we are frequently asked about.

Is Coral Coast Cabinets a licensed operator?

Absolutely! We are fully licensed with the BSA as all cabinet makers should be. QBCC license number 1087450.

What is your warranty?

Coral Coast Cabinets workmanship guarantee is for the lifetime of the kitchen. There are many variables and different products involved in a full kitchen and the warranty varies from product to product. At Coral Coast Cabinets we only use the best materials and hardware in the first place in an attempt to avoid any issues at any stage in the useful life of the cabinetry. Normal exclusions apply ie misuse, abuse, low flying aircraft etc.

What kind of hinges do you use?

We only use the highest quality Blum product from Austria (yes its still made in Austria). I have always used Blum. The lifetime warranty and smooth action make it a no-brainer.

What about drawers?

As above, we only use Blum brand. The design of todays modern kitchens can include draws everywhere including corners and under sink. The use of the premium Blum product allows these features as well as electronic draws and softclose draws.

Is particle board crap and do you use it?

Yes we do use particle board **BUT** it is high moisture resistant particle board, if moisture is your concern with the use of particle board. It is also worth noting that Coral Coast Cabinets also uses MR (moisture resitant) MDF where this product is used. Is particle board crap? Non moisture resistant board certainly is no good where moisture is present and would only ever be used by amateurs as the price difference is quite small.

What about tapware, ovens cooktops etc. Do you supply these.

No. We work in with the local appliance and plumbing suppliers to make sure your new appliances fit perfectly.

How do I go about getting you to do a quote?

Bring in a plan to our office in Brickworks Circuit, Bundaberg. Alternatively give us a call and we will come to you. In the showroom we have various samples of finishes (2-pac, melamine, stone, solid timber, etc) and we can also show you different hardware options (handles, draw systems, etc).

How long will it take till my new kitchen is installed?

Once the final design is in place expect to wait 2 – 3 weeks for your new kitchen to be carefully installed. Some finishes and materials may add a week or so to this schedule. We can plan all this well ahead and make sure your new cabinetry is installed at a time to suit you.
