micro thread control

1150MDA
BERNINA⁺

Impressive creative potential, fast sewing speeds and a wide variety of applications – you'll be thrilled by what the BERNINA 1150MDC can do! This versatile overlocker is equally at home sewing garments and home textiles. The patented *mtc* thread control ensures a perfect seam at the turn of a knob.

Ease of operation as standard

Patented swing-out presser foot
Simply swing the foot out to the side to give yourself plenty of room for easy threading and a hassle-free needle change.

Rolled-hem lever
Simply flick the rolled-hem lever to switch effortlessly to a rolled-hem stitch and back again, with no need to change the stitch plate or presser foot.

Auto-threader for two needles
Actively supports you by letting you thread both needles easily and ergonomically.

Front foot lift system
The front foot lift gives an additional lift to the front of the presser foot, making it possible to accurately position multiple layers of fabric and bulky projects such as hand-knitted jumpers underneath it.

Threading (Lay-in) System
The BERNINA lay-in system lets you thread quickly and directly at all times. Thanks to the automatic lower-looper threading system, it's also a cinch to thread the lower-looper.

mtc knob
Thanks to the patented *mtc* thread control, it's finally possible to directly set the over-edge thread length and achieve the perfect seam at the turn of a knob!

Safety switch
The safety switch is activated as soon as you open the looper cover or the fabric-support plate, thus preventing the accidental operation of the serger during e.g. the threading process.

Professional knife drive from above
Provides the greatest, most robust cutting force. Even thick fabrics won't deflect the upper knife – so all fabric edges can be trimmed safely and professionally.

Differential feed
Stepless differential feed ensures wave-free seams in knits, and prevents puckering in fine fabrics – as well as allowing deliberate gathering.

Handwheel position indicator
Easy, ergonomic operation: With the aid of the vision panel and the red position indicators, you'll find the ideal threading position for the needles and the lower looper straightaway.

Accessories in the looper cover
Here you'll find the most commonly used accessories, neatly arranged and ready-to-hand.

Swing-out upper-knife arm
The upper-knife arm can be quick-released effortlessly at the press of a button to provide more space.

Elasticator foot
The elasticator foot guides and stretches elastic. Ideal for lingerie, bath- and sportswear, home textiles, etc.

Blindstitch foot
The blindstitch foot features an adjustable lateral guide plate which takes the hard work out of sewing blind hems. Suitable for blindhemming, flatlocking and heirloom techniques.
