Aspenstone®	10
Coast®	11
Cloisters™	12

Introduction

Catering to a range of modern and classic design schemes, Boral's paving collection will give your outdoor area the individual touch it's been waiting for, designed to suit a range of applications around the home including walkways, patios, courtyards, pool surrounds and driveways.

Boral pavers come in a carefully selected number of colour palettes and textures, offer flexible installation options, require little maintenance and most are thick enough to be laid directly on to crushed rock and sand. This saves you time and reduces costs, making your outdoor design dream a reality.

Our Pavers

ABOUT GEOFIX®

Geo-Fix® is an air-cured joint filler for pavers and retaining walls. This ready to use jointing material is suitable for applying a permanent, rigid joint over 5mm wide and a minimum 25mm deep on all types of paving including concrete, natural stone, slate, clay and granite.

It means no more trowelling, hiring a compactor, wasting water and hours of cleaning to complete the task—simply scatter, sweep and leave.

For a complete guide to Geo-Fix® visit www.boral.com.au/geofix

CARING FOR PAVERS

Bradstone® Gironde

PREVENTION IS BETTER THAN CURE

Bradstone

- Sweep regularly with a stiff bristled broom to keep pavers free from debris.
- For maximum protection we suggest pavers are sealed after installation with a penetrating sealer. (Please check with a reputable sealing company for advice.)
- Re-seal pavers as required taking special care in heavy wear areas and salt-water locations.
- During construction, cover the paved areas to protect against damage.
- Protect your pavers against possible staining from mortar, oxides, cement and rust.
- The use of acid and chemically-based cleaning agents should be undertaken by a professional. They can be hazardous if used incorrectly.
- In all cases, attempt to clean a stain before it hardens or dries up.
