

## Kaba 600mm stainless steel pull handles

[locksmith](#)

Kaba Australia is proud to announce the introduction of the PH600 and PH601 stainless steel pull handles. These 600mm pull handles are made from 304 grade stainless steel and feature an aluminium insert and stainless steel fixing screws.

The PH600 consists of a straight pull handle, while the PH601 offers an off-set pull handle, providing two stylish options for entranceways. Both models are available as a single fixing or as a back to back fixing and come in a contemporary satin stainless finish.

Both pull handles meet the requirements of AS1428 Design for Access and Mobility and have been designed to complement our existing range of architectural door hardware.
