Carpentry & Building
Testimonials

Enmore

We first encountered Barry when we needed to renovate our kitchen in a hurry before selling our former home. We quickly realised we'd met our Builder For Life - he adapted my slightly skewiff design to make the kitchen work, and solved every problem we had trying to fit new cupboards into an oddly-shaped room in a house that was more than 120 years old. The kitchen was done in double-quick time, and the finish was immaculate.

We went on to buy a big old nine-bedroom place which is a very long-term project. Barry has just completed double French doors leading from the kitchen into the garden, and as always the work is immaculate. He takes the extra steps required to make each job perfect. As a bonus, he's a friendly guy and a pleasure to have around, which helps if you're going to have someone working in your home for weeks at a time! We hope we'll continue to work with him for the many, many years we'll need to complete our home.

Kareela

We have been using Barry Patterson Carpentry and Building for several years now for our family home in the Sutherland Shire. We have had the privilege of working with Barry on many occasions now from small jobs to larger ones and no matter what the size, they all have quality workmanship and consistency in common. Barry treats your home as if it were his own, provides honest feedback, is reliable and a pleasure to deal with. I have also found that the tradespeople he aligns himself with also have many of the same qualities. Although Barry can get very busy throughout the year, on several occasions, when we needed him urgently, he was able always able to accommodate us.
