

# GYPROCK®

Everything else is just plasterboard

## Sensitive Choice® approved products

# Mould Facts

Mould can produce millions of spores that can easily become airborne and can be a dangerous asthma trigger as well as causing a range of respiratory symptoms. Even the best constructed buildings can suffer from mould and mildew especially in humid climates and when parts of the building are not well ventilated.

Gyprock's Sensitive Choice® approved plasterboard has been repeatedly tested to the internationally recognised film fungal resistance measure ASTM G21 and showed zero mould growth more than 2 years after being inoculated with a mixed fungal spore suspension. Ultra-Base 60 has also been tested to this standard with the same zero-growth result.

# VOC Facts

Volatile organic compounds are chemicals that evaporate at room temperature, releasing molecules into the air. VOCs are in many products found in our living spaces including carpets, paint and furniture and can be very irritating for asthma and allergy sufferers. Indoor air quality is vital for home occupants, and various environmental assessment bodies stipulate safe limits on the amount of VOCs that products used in buildings should generate.

All Gyprock plasterboard and jointing compounds have well below the GBCA limits of VOC.

# Plasterboard choices for commercial and residential projects

Gyprock has led the market with the development of high performance plasterboards with exceptionally low VOC levels. In 2011, Gyprock introduced a highly effective mould resistant additive to produce Gyprock EC08™ Complete - a 13mm and 16mm plasterboard designed for specialised commercial projects where indoor environment quality is vital. EC08 Complete is also fire and acoustic rated, with high levels of moisture and impact resistance. Architects and designers specify and trust Gyprock EC08 Complete for commercial projects where hygiene is essential such as hospitals, aged care and education projects.

The most recent Gyprock plasterboard to receive Sensitive Choice® approval is Gyprock Sensitive - a revolutionary, hypoallergenic 10mm plasterboard designed for use in residential projects where mould and moisture resistance is required.

## Sensitive Choice® approved plasterboards feature:

- Enhanced mould resistance – treated with a powerful but gentle antifungal agent throughout the plasterboard core which penetrates through the paper liner and paint coating
- Improved moisture resistance – the plasterboard core contains moisture resistant additives making it suitable for high humidity situations
- Low VOC
- GECA accredited
- Sensitive Choice® approved

## Jointing compound for increased protection

### New Gyprock Ultra-Base 60

Gyprock Ultra-Base 60 is a premium, ready-to-mix, dry powder base coat that provides added mould resistance for the whole joint.

### Ultra-Base 60 features

- Superior mould resistance
- Lightweight plaster formulation – 16kg of Ultra-Base is equivalent to a standard 20kg Base Coat bag
- Ultra-easy to apply – ideal for machine tools
- Ultra-easy to scrape back
- Ultra-smooth finish with low shrinkage
- Low VOC
- GECA accredited
- Sensitive Choice® approved

# A more sensitive choice

2.3 million Australians suffer from asthma.

Sensitive Choice® is a community service program created by the National Asthma Council Australia to identify products that are a better choice for these people and all of us who want to breathe purer, cleaner, fresher air.

Gyprock has developed products for both residential and commercial applications that address the needs of this large and growing group and these are the only plasterboard products that have been approved by the Sensitive Choice® program.

# Manufactured for Life

As with all Gyprock products, Gyprock® Sensitive, EC08™ Complete and Ultra-Base 60 are covered by Gyprock's Manufactured for Life warranty – the longest in the Australian plasterboard industry.

Gyprock products are manufactured for life, with all CSR products designed to achieve optimal performance when part of a CSR integrated system.

Gyprock continues to lead the market with premium quality products that are the preferred choice of plastering professionals.

Full warranty details can be found at [www.gyprock.com.au/warranty](http://www.gyprock.com.au/warranty).
