COMPANY PROFILE

Founded in 1998 Liquitech (Qld) Pty.Ltd. was established to satisfy a genuine need for an independent pumping, aeration, filtration and power equipment supplier to service the Industrial and Municipal markets throughout Queensland and Asia-Pacific regions.

Liquitech offer the following services in the Environmental, Mining & Industrial Process Field:-

- ***Operator advisory service.***
- ***Process optimization advice.***
- ***Preventive maintenance proposals.***
- ***Contract operators.***
- ***Contract management.***
- ***Supply & installation of plant & equipment packages.***

Liquitech can now boast having in excess of 70 years combined experience in the pump, wastewater, aeration, filtration and renewable energy industries with Paul Brearley recently joining the company as Business Development Manager – South Queensland.

Proudly supported by several of the World's leading Pump, Filtration, Aeration Equipment, Valve, Power Generation & Power Transmission manufacturers in their respective markets namely Grundfos, Boerger, Ebara, Gardner Denver, Weg, SEW Eurodrive, Bermad & Siemens. Liquitech has the technical expertise and resources network to offer the right Plant or Package for the job.

Liquitech is able to submit a commercially attractive and hydraulically competitive proposal on any pump, filtration, aeration, power generation or transmission application. We have the ability to provide complete packages, from initial selection to installation, commissioning & maintenance.

The success of Liquitech (Qld) Pty.Ltd will be a reflection of our people's and supplier's commitment to customer service and to satisfy the demand of an ever changing market place. Our mission is to provide quality equipment through services that are tailored to meet our client's requirements no matter how unique. All associated with Liquitech are dedicated to achieving this result.
