

BioGuard® Product Catalogue – Pool.

What's New in 2008.

Liquid Blanket™

BioGuard® **Liquid Blanket™** is a highly effective silicon-based product, which can reduce the evaporation of water from your customers' pool or spa by over 50% while retaining water temperature.

BioGuard® **Liquid Blanket™** forms a colourless layer on the surface of the pool or spa and adapts to any shape. It can save water, heat loss, money and is easy to apply. BioGuard® **Liquid Blanket™** is non-hazardous, non-toxic and won't affect water quality. Classified as a non-dangerous good, it is also storage and transport friendly.

Product Code	Size
20021737	12 x 500ml

Power Chlor®

Power Chlor® uses patented granular technology with multi-functional properties and is less hazardous than standard pool chlorine. Each co-compacted granule contains trichlor for killing algae and bacteria, chlorine-tolerant clarifiers for keeping water crystal clear and water clarifying agents to provide a silky smooth feel to the water whilst reducing skin and eye irritation. Classified as a non-dangerous good, it is also storage and transport friendly. **Power Chlor® is now available in a new easier to store, easier to apply, 5kg pack which includes a measuring scoop.**

Product Code	Size
20020073	3 x 5kg

Super Clear Clarifying Tabs™

BioGuard® **Super Clear Clarifying Tabs™** are 60g tablets containing the proprietary clarifier Poly A 2000 which aids in the removal of both organic and inorganic wastes by gathering together particles that can cause dull and cloudy water. BioGuard® **Super Clear Clarifying Tabs™** are classified as a non-dangerous good with once-a-week skimmer application. They improve water clarity, filtration, sanitiser effectiveness and water softness. **Now available in two new sizes – a 9kg pack and a counter display box for add on sales and trial.**

Product Code	Size
20020131	12 x 6 x 60g
20021819	60 x 60g
20021820	1 x 9kg

Salt Pools.

Salt chlorination has overcome the limitations of hand-dosing through the on-site production of chlorine. Current estimates place salt chlorination in over 60% of all pools in Australia and New Zealand. BioGuard® has therefore developed the following range of salt pool products to enhance the operation of salt pools.

Salt Pool Sticks™

BioGuard® **Salt Pool Sticks™** are 225g sticks that dissolve much slower than regular trichlor sticks or tablets when the pump is off and can last up to twice as long.

Product Features:

- 976g/kg trichloroisocyanuric acid.
- 880g/kg available chlorine.
- Added **Smart Guard™** chlorine protector.
- pH of 1% solution = 2.9.
- Lasts up to twice as long as ordinary trichlor sticks or tablets.
- Designed for weekly skimmer application to augment salt chlorination.

Benefits:

- Stabilised chlorine compounds not lost to the sun's UV rays.
- Does not cloud the water.
- Helps maintain stabiliser level and improve salt cell efficiency.
- Once-a-week maintenance.

Product Code	Size
20020025	8 x 1.8kg

Salt Pool Sparkle®

BioGuard® **Salt Pool Sparkle®** is a maintenance oxidiser for salt chlorinated pools with a unique blend of oxidising and clarifying agents.

Product Features:

- 600g/kg sodium dichloroisocyanurate.
- 372g/kg available chlorine.
- pH of 1% solution = 6.7.
- Patented blend of oxidising and clarifying agents.
- Totally soluble and dissolves almost instantly.
- Destroys chloramines and musty odours.
- Clarifying agents aid the filter in removing small suspended particles.
- For use in all salt-chlorinated pools.
- Classified as a non-dangerous good

Benefits:

- Easy to use.
- Allows swimmers back in water quicker.
- Makes maintenance a simple weekly process.
- Storage and transport friendly

Product Code	Size
20020026	3 x 8 x 450g
20020027	35 x 450g

*Non-Dangerous Good as classified by The Australian Dangerous Goods code, 7th edition – endorsed by The Australian Transport Council.

Salt Pool Protector™

BioGuard® **Salt Pool Protector™** Algae Inhibitor is a highly effective algae inhibitor that works extremely well with salt chlorinators to prevent a broad variety of algae growth.

Product Features:

- 42g/L copper present as Copper Sulphate
- pH = 2.5.
- Unique non-staining formulation.
- More effective against a wider variety of algae than many algae preventatives.
- Withstands up to 50 ppm of chlorine.
- Built-in water clarifiers.
- Contains metal chelating agents to prevent staining.

Benefits:

- Effective against all common and many mutant strains of algae.
- Long-lasting protection in salt chlorinated pools.
- Faster removal of dead algae.

Product Code	Size
20020023	12 x 1L

Salt Pool Stabiliser™

BioGuard® **Salt Pool Stabiliser™** is a granular cyanuric acid for use in salt chlorinated systems that prevents chlorine loss due to sunlight and prolongs salt cell life.

Product Features:

- 1000g/kg cyanuric acid.
- pH 4.0 - 4.5.
- Classified as a non-dangerous good

Benefits:

- Reduces maintenance costs.
- Reduces chlorine consumption.
- Extends life of salt cell by reducing chlorine generation demands.
- Storage and transport friendly.

Product Code	Size
20020342	6 x 2kg

*Non-Dangerous Good as classified by The Australian Dangerous Goods code, 7th edition - endorsed by The Australian Transport Council.

Salt Pool Stain & Scale Control™

BioGuard® **Salt Pool Stain & Scale Control™** is a liquid sequestering agent that prevents the formation of scale in salt chlorinated pools.

Product Features:

- 133g/L 2-Phosphonobutane-1,2,4-TriCarboxylic Acid.
- Liquid sequestering agent.
- Prevents formation of crystalline calcium, magnesium and other water hardness ions.
- Helps prevent scale build-up from high calcium levels.
- Chelates iron, copper, manganese and heavy metals to prevent staining of pool surfaces.

Benefits:

- Helps prevent costly repair bills.
- Helps prevent serious damage to pool surface and equipment.
- Removes many freshly deposited metal stains from surfaces.

Product Code	Size
20020021	12 x 1L

Salt Cell Cleaner™

BioGuard® **Salt Cell Cleaner™** is designed to effectively clean chlorinator cells of scale deposits and other material without damaging the cell.

Product Features:

- 348g/L phosphoric acid and 25g/L hydrochloric acid.
- Also contains metal sequestering agents and detergents.
- Removes scale build-up from salt cells.

Benefits:

- Cell efficiency improves prolonging cell life and reducing costs.
- Won't damage cells unlike straight hydrochloric acid.

Product Code	Size
20020022	12 x 1L

Sanitisers.

Sanitising pool water treats bacteria, which can be harmful to people using the pool. Bacteria is caused by a wide variety of sources such as rain, dust, insects and birds. Sanitiser levels need to be maintained to keep bacteria at bay and also as an aid in controlling algae. BioGuard® offers several chlorine based pool sanitiser options, that present a cost effective alternative to Cal Hypo and other liquid chlorines. Our Sanitisers are user friendly, with many being non-dangerous goods. They are storage and transport friendly, simple to use and very effective in maintaining a healthy pool.

Smart Sticks®

BioGuard® **Smart Sticks®** are 225g sticks containing **Smart Guard™**. Designed for weekly skimmer application, they dissolve much slower than regular trichlor sticks or tablets when the pump is off and, as a result, can last up to twice as long.

Product Features:

- 976g/kg trichloroisocyanuric acid.
- 880g/kg available chlorine.
- Added **Smart Guard™** chlorine protector.

Benefits:

- More gentle on vinyl liners and equipment.
- Does not cloud the water.
- Once-a-week maintenance.
- Easy to use with no need to pre-dissolve.
- Concentrated so you use less.
- Minimal impact on water balance, saving you money.
- Built in clarifiers and enhancers for crystal clear water.
- Stabilised chlorine compounds are not lost to the sun's UV rays.

Product Code	Size
20020046	36 x 450g
20020047	8 x 1.8kg
20020048	4 x 3.6kg
20020049	1 x 9kg
20020050	1 x 20kg

Power Chlor®

BioGuard® **Power Chlor®** is a revolutionary patented product. Each co-compacted granule contains trichlor for killing algae and bacteria, chlorine-tolerant clarifiers for keeping water crystal clear, and water-enhancing agents to provide a silky smooth feel to the water whilst reducing skin and eye irritation.

Product Features:

- 727g/kg trichloroisocyanuric acid.
- 660g/kg available chlorine.
- Unique co-compacted granular product.
- Skimmer-fed application.
- Classified as a non-dangerous good.

Benefits:

- Improves filter efficiency.
- Less skin and eye irritation than many chlorinating products.
- Easy to use with no need to pre-dissolve.
- Concentrated so you use less.
- Minimal impact on water balance, saving you money.
- Storage and transport friendly.

Product Code	Size
20020074	35 x 500g
20020077	12 x 1kg
20020073	3 x 5kg
20020075	1 x 10kg
20020076	1 x 20kg

*Non-Dangerous Good as classified by The Australian Dangerous Goods code, 7th edition – endorsed by The Australian Transport Council.

Pacific Blue Power Tabs®

BioGuard® **Pacific Blue Power Tabs®** are unique patented 160g pool tablets that provide optimum sanitation for pools, as well as having multifunctional capabilities to assist in buffering and clarifying pool water.

Product Features:

- 723g/kg trichloroisocyanuric acid.
- 650g/kg available chlorine.
- Totally soluble, multifunctional 160g tablet.
- Built-in chlorine-tolerant clarifiers and water-enhancing agents.
- Can be used in skimmers, floaters or feeders.
- Classified as a non-dangerous good.

Benefits:

- Ensures sparkling clear pool water.
- Save money as up to 20% less product required than comparable sanitisers.
- Less skin and eye irritation than many chlorinating products.
- Easy to use.
- Minimal impact on water balance, saving you money.
- Consistent chlorine levels for better protection.
- Storage and transport friendly.

Product Code	Size
20020040	12 x 1.6kg
20020042	1 x 8kg
20020043	1 x 20kg

Swim Clear™

BioGuard® **Swim Clear™** is a completely soluble, stabilised granular chlorinating product suitable for both regular sanitation and shocking.

Product Features:

- 970g/kg sodium dichloroisocyanurate dihydrate.
- 560g/kg available chlorine.
- pH of 1% solution = 6.0.
- Classified as a non-dangerous good.

Benefits:

- Completely and instantly soluble, leaving no residual.
- Will not cloud water.
- Excellent for sanitising small above ground pools.
- Concentrated so you use less.
- Minimal impact on water balance, saving you money.
- Storage and transport friendly.

Product Code	Size
20020033	12 x 1kg
20020035	3 x 4kg
20020345	1 x 10kg
20020346	1 x 20kg

Oxidisers.

Oxidation removes swimmer wastes and destroys organic contaminants in the water. The aim of regular oxidation is to keep the pool water sparkling and clear of impurities. Oxidation also removes chloramines, which are the result of Free Chlorine reacting with nitrogen-based material in the water. Chloramines are often the cause of skin and eye irritation, and the overbearing smell often blamed erroneously on the chlorine itself.

Lite®

BioGuard® **Lite®** is a patented maintenance oxidiser for chlorinated pools with a unique blend of oxidising and clarifying agents that improves chlorine efficiency.

Product Features:

- 600g/kg sodium dichloroisocyanurate.
- 372g/kg available chlorine.
- pH of 1% solution = 6.7.
- One 450g bag treats a 50,000 litre pool.
- Dissolves almost instantly and is totally soluble.
- Destroys chloramines and musty odours.
- Clarifying agents aid the filter in removing small suspended particles.
- Classified as a non-dangerous good.

Benefits:

- Easy to use.
- Allows swimmers back into the water after an hour.
- Makes maintenance a simple weekly process.
- Storage and transport friendly.

Product Code	Size
20020064	3 x 8 x 450g
20020065	35 x 450g
20020066	1 x 10kg
20020067	1 x 20kg

Burn Out Extreme®

Burn Out Extreme®'s multifunctional granules provide a convenient and economical means for shocking swimming pools and for treating pools with chlorine demand and/or algae problems.

Product Features:

- 727g/kg trichloroisocyanuric acid.
- 660g/kg available chlorine.
- One 600g bag treats a 50,000 litre pool.
- Totally soluble, multifunctional granular product.
- Built-in clarifiers and water-enhancing agents.
- Skimmer-fed one bag application.
- Classified as a non-dangerous good.

Benefits:

- Ideal for solving chlorine demand issues.
- Ensures sparkling clear pool water.
- Improves filter efficiency.
- Less skin and eye irritation than many chlorinating products.
- No need to pre-dissolve.
- Easy to use.
- Storage and transport friendly.

Product Code	Size
20020072	25 x 600g

Burn Out® 35

BioGuard® **Burn Out® 35** is an unstabilised chlorine shock that eliminates undesirable compounds like body oils, perspiration and urine. It can be used for either maintenance or problem solving.

Product Features:

- 290g/kg lithium hypochlorite.
- 350g/kg available chlorine.
- One 450g bag treats a 35,000 litre pool.
- Eliminates undesirable contaminants in the water.
- Totally soluble - does not cloud water.
- Convenient pre-measured bags.
- Works well in pools with high CYA as it is unstabilised.

Benefits:

- Restores water sparkle.
- Does not affect calcium hardness.
- Eliminates undesirable compounds.
- Easy to use with no pre-dissolving.
- Excellent for hard water areas.

Product Code	Size
20020061	35 x 450g

Algaecides.

Traditionally, sanitisers have been used to treat and control algae but this is proving to be much less reliable as algae species become more diverse and resistant. This leads us to the need for control agents designed specifically to counter the defense mechanisms algae has developed to protect itself.

Even if we can't see them, algae spores are always present and when they become active, they thrive on wastes in the water and dramatically multiply in numbers. It is important to control algae in swimming pools for health, safety and aesthetic reasons. An algae-infested swimming pool is also an expensive and frustrating problem to correct.

Back-Up® II

BioGuard® **Back-Up® II** is a copper-based algae inhibitor that works extremely well with chlorinating products to prevent a broad spectrum of algae growth.

Product Features:

- 42g/L copper active present as copper sulphate.
- Unique non-staining formulation.
- Contains metal chelating agents.
- Built-in water clarifiers help remove dead algae.
- Easy to measure residual in the water.

Benefits:

- Effective against all common and many mutant strains of algae.
- Long-lasting algae prevention.
- Faster removal of dead algae when used with **Quick Clear™**.
- Clearer pool water.
- Negligible effect on water balance.
- Will not stain pool surfaces.

Product Code	Size
20020081	12 x 1L
20020082	1 x 20L

AlgiGuard®

BioGuard® **AlgiGuard®** is a highly effective quat-based algaecide that works well with chlorinating products to prevent a wide variety of algae.

Product Features:

- 400g/L benzalkonium chloride.
- Non-staining formulation.
- Powerful wetting agent.
- Stable in sunlight and will not evaporate.

Benefits:

- Prevents wide spectrum of algae growth.
- Also effective as a duck deterrent and floating/swimming insect killer.
- Negligible effect on water balance.

Product Code	Size
20020079	12 x 1L

Polygard™

BioGuard® **Polygard™** is a non-foaming polyquat algae preventative and algaecide that is excellent for use in pools with attached spas, fountains, or jetted returns.

Product Features:

- 460g/L polixetonium salts.
- pH = 6.4.
- Non-foaming.
- Non-staining.
- Effective on all algae types.
- Works with chlorine or bromine.
- Classified as a non-dangerous good.

Benefits:

- Excellent for use in pools with attached spas or fountains.
- Use to treat stubborn algae growth.
- Negligible effect on water balance.
- Also effective as a duck deterrent.
- Storage and transport friendly.

Product Code	Size
20020090	12 x 1L

MSA™ II

BioGuard® **MSA™ II** is a unique, patented, copper-based algaecide that works fast in curing most types of algae, including many mutant strains.

Product Features:

- 40g/L copper active present as copper sulphate.
- Will add between 0.4 and 0.7 ppm copper when properly applied.
- Non-foaming.
- Works in pools treated with chlorine or bromine.
- Easy to measure residual in the water.

Benefits:

- Rapidly kills off most types of algae.
- Will not stain pool surfaces (unlike most copper algaecides).
- Fast removal of dead algae when used with **Quick Clear™**.
- Clearer pool water.

Product Code	Size
20020087	12 x 1L
20020088	1 x 20L

*Non-Dangerous Good as classified by The Australian Dangerous Goods code, 7th edition – endorsed by The Australian Transport Council.

Balancers.

Water balance is important as it ensures that the mineral content of the water is in an appropriate state to protect the pool surface and equipment and make water more comfortable to swim in. Water balance is affected by a wide range of variables - the quality of the source water, what chemicals are going into the water, the exposure of the pool to weather conditions and so on.

A proper balance of chemical factors such as total alkalinity, pH and calcium, is needed for the sanitiser to work correctly, the water to be pleasant to swim in, and to prevent scaling or corrosion of the pool surface and equipment.

Stabiliser™

BioGuard® **Stabiliser™** is a granular cyanuric acid that prevents chlorinating product loss due to sunlight.

Product Features:

- 1000g/kg cyanuric acid (CYA).
- Prevents chlorine loss due to sunlight.
- For use with chlorine systems only (not suitable for use with Brominating Tablets).
- Classified as a non-dangerous good.

Benefits:

- Reduces chlorine consumption.
- Reduces maintenance costs.
- Reduces distortion of vinyl liners and helps prevent wrinkling.
- Ideal for outdoor swimming pools.
- Storage and transport friendly.

Product Code	Size
20020333	12 x 1kg
20020332	6 x 2kg
20020335	1 x 25kg

Lo'N'Slo™

BioGuard® **Lo'N'Slo™** is a granular product designed to decrease Total Alkalinity and pH levels in pool water to prevent cloudy water, scale formation, high acid demand and poor chlorine efficiency.

Product Features:

- 1000g/kg sodium hydrogen sulfate.
- Lowers Total Alkalinity and pH.
- For all pool types.
- Classified as a non-dangerous good.

Benefits:

- Prevents corrosion of equipment.
- Prevents etching of concrete and grout, and wrinkling of liners.
- Reduces the risk of scale formation.
- Easier to use than liquid acid (hydrochloric acid, muriatic acid).
- Storage and transport friendly.

Product Code	Size
20020092	8 x 1.5kg
20020094	1 x 10kg
20020095	3 x 5kg
20020355	1 x 25kg

*Non-Dangerous Good as classified by The Australian Dangerous Goods code, 7th edition – endorsed by The Australian Transport Council.

Balance Pak™ 100

BioGuard® **Balance Pak™ 100** is a soluble powder that eliminates pH bounce and raises Total Alkalinity.

Product Features:

- 1000g/kg sodium hydrogen carbonate (sodium bicarbonate).
- Raises Total Alkalinity.
- For all pool types.
- Classified as a non-dangerous good.

Benefits:

- Protects the pH from being influenced by factors such as rain, swimmer load, and other chemical application.
- Prevents corrosion of equipment.
- Storage and transport friendly.

Product Code	Size
20020356	6 x 2kg
20020357	4 x 4kg
20020105	2 x 8kg
20020359	1 x 25kg

Balance Pak™ 200

BioGuard® **Balance Pak™ 200** is a soluble pH increaser that is suitable for all pool types.

Product Features:

- 1000g/kg sodium carbonate (dense soda ash).
- Raises pH.
- For all pool types.
- Classified as a non-dangerous good.

Benefits:

- Prevents corrosion of equipment.
- Prevents etching of concrete and grout, and wrinkling of liners.
- Prevents eye irritation due to low pH.
- Storage and transport friendly.

Product Code	Size
20020360	6 x 2kg
20020361	4 x 4kg
20020362	1 x 25kg

*Non-Dangerous Good as classified by The Australian Dangerous Goods code, 7th edition – endorsed by The Australian Transport Council.

Balance Pak™ 300

BioGuard® **Balance Pak™ 300** is a soluble calcium hardness increaser.

Product Features:

- 740g/kg calcium chloride.
- Pelletised formulation allows for faster dissolving.
- Less likely to cloud the water on application.
- No pre-dissolving.
- Classified as a non-dangerous good.

Benefits:

- Prevents corrosion of equipment.
- Prevents etching of plaster and wrinkling of liners.
- Storage and transport friendly.

Product Code	Size
20020364	6 x 2kg
20020365	4 x 4kg
20020112	2 x 8kg
20020363	1 x 25kg

Scale Inhibitor™

BioGuard® **Scale Inhibitor™** is a sequestering agent that prevents the formation of scale from high calcium levels. **Scale Inhibitor™** can also help remove some scale build-up.

Product Features:

- 133g/L 2-Phosphonobutane-1,2,4-TriCarboxylic Acid.
- Liquid sequestering agent.
- Prevents formation of crystalline calcium, magnesium and water hardness ions.
- Helps remove scale build-up.

Benefits:

- Helps prevent costly repair bills.
- Helps prevent serious damage to pool surface and equipment.

Product Code	Size
20020115	12 x 1L

*Non-Dangerous Good as classified by The Australian Dangerous Goods code, 7th edition - endorsed by The Australian Transport Council.

Pool Magnet™

BioGuard® **Pool Magnet™** is a chelating agent that binds iron, copper and manganese in the water to prevent them from being oxidised and staining the pool surface or discolouring the water.

Product Features:

- Liquid chelating agent.
- Helps prevent staining from iron, copper and manganese.
- Helps remove fresh stains.
- Eliminates water discolouration from oxidised metals.
- When used according to label instructions, product remains effective for up to 4 weeks.

Benefits:

- Prevents discoloured water.
- Removes unsightly staining.

Product Code	Size
20020114	12 x 1L

Specialty.

One of the major differences that sets BioGuard® apart from most of its competitors is its research and development into value-added technologies. The following products are designed to further enhance the swimming experience by:

- Improving swimmer comfort.
- Reducing skin and eye irritation.
- Improving water clarity.
- Enhancing performance of products like sanitisers and oxidisers.
- Helping to prevent the growth of algae.

These benefits improve the swimming experience and help to care for and protect your customer's valuable asset.

Liquid Blanket™

BioGuard® **Liquid Blanket™** is a highly effective silicon-based product, which can reduce the evaporation of water from pools and spas by over 50%, while retaining water temperature.

Product Features:

- Non-toxic.
- Ideal for any shape, salt water or freshwater pool or spa.
- Classified as a non-dangerous good.

Benefits:

- Easy to use – just squeeze and pour.
- Reduces water evaporation by over 50%.
- Helps retain water temperature.
- Helps the environment.
- Storage and transport friendly.

Product Code	Size
20021737	12 x 500ml

Super Clear Clarifying Tabs™

BioGuard® **Super Clear Clarifying Tabs™** are 60g tablets containing the proprietary clarifier Poly A 2000 which aids in the removal of both organic and inorganic wastes by gathering together particles that can cause dull and cloudy water.

Product Features:

- Cationic polymeric flocculant.
- Unique 60g clarifying tablets.
- Built-in water enhancing agents.
- Weekly skimmer application.
- Compatible with all types of filtration systems.
- Non-toxic.
- Classified as a non-dangerous good.

Benefits:

- Promotes excellent water clarity.
- Enhances filtration.
- Improves sanitiser effectiveness.
- Storage and transport friendly.

Product Code	Size
20020131	12 x 6 x 60g
20021819	60 x 60g
20021820	1 x 9kg

*Non-Dangerous Good as classified by The Australian Dangerous Goods code, 7th edition – endorsed by The Australian Transport Council.

Polysheen Plus™

BioGuard® **Polysheen Plus®** is a highly concentrated product that combines small particles into larger ones, making it much easier for the filter to remove debris and insoluble compounds.

Product Features:

- Specially formulated liquid polymer blend.
- Contains no alum.
- Does not affect pH.
- Highly concentrated, yet does not require dilution.
- Safe for all pool and filter types.
- Classified as a non-dangerous good.

Benefits:

- Water is restored to sparkling.
- Easy to use.
- Excellent as a problem solver for cloudy pools where chlorine demand is not an issue.
- Storage and transport friendly.

Product Code	Size
20020128	36 x 250ml
20020126	12 x 1L

Optimiser®

BioGuard® **Optimiser®** is a multifunctional granular product that enhances water comfort, increases water clarity, improves the performance of other products and suppresses the growth of algae.

Product Features:

- 1000g/kg boric acid.
- Increases water clarity.
- Improves performance of all BioGuard® 3 Step System products.
- For use in all pool types.
- Stable in sunlight and does not evaporate.
- Test Optimiser levels easily with **AccuScan™**
- Classified as a non-dangerous good.

Benefits:

- Provides sparkling, silky water.
- Conditions the water to be more comfortable for swimmers.
- Less skin and eye irritation.
- Suppresses the growth of algae.
- Gets better results from any sanitiser type, so saves time and money.
- Enhances water comfort.
- Storage and transport friendly.

Product Code	Size
20020053	4 x 2kg
20020054	1 x 10kg

Power Floc™

BioGuard® **Power Floc™** is a concentrated flocculant that coagulates and settles suspended particles to the bottom of the pool for easy removal with a vacuum.

Product Features:

- Non-alum, polymeric cationic coagulant.
- Concentrated formulation.
- Settles suspended particles to the bottom for removal by vacuum.
- Up to three times faster than many flocculants on the market.
- Suitable for all pool types.
- The greater the amount of debris in the water, the faster **Power Floc™** works.
- Classified as a non-dangerous good.

Benefits:

- Makes water clear and sparkling.
- Excellent problem solver for very cloudy pools.
- Storage and transport friendly.

Product Code	Size
20020130	12 x 1L

Chem Out™

BioGuard® **Chem Out™** is a granular neutraliser that reduces excessive chlorine or bromine.

Product Features:

- 1000g/kg sodium sulfate.
- Reduces pool down time due to excessive chlorine and bromine residuals.
- Does not affect pH.

Benefits:

- For use in all types of pools.
- Allows swimmers to re-enter pool quicker.
- Excellent problem solver where too much sanitiser has been added.

Product Code	Size
20020121	12 x 1.5kg

*Non-Dangerous Good as classified by The Australian Dangerous Goods code, 7th edition - endorsed by The Australian Transport Council.

Quick Clear™

BioGuard® **Quick Clear**™ assists in restoring the sparkle and polish to swimming pool water, and is particularly suited to removing suspended minerals and dead algae.

Product Features:

- 1000g/kg cellulose fibre.
- Restores water sparkle.
- Facilitates the removal of metals.
- Aids the filter in removing tiny particles of dirt, plaster dust, dead algae, pollen, etc.
- For use with all filter types.
- Can also be used as a filter aid.
- Classified as a non-dangerous good.

Benefits:

- Makes water clear and sparkling.
- Removes metals to prevent staining.
- Improves filter performance.
- Storage and transport friendly.

Product Code	Size
20020124	20 x 150g

Filter Brite™

BioGuard® **Filter Brite**™ restores the efficiency of pool water filters by removing scale and rust deposits, greases, oils and organic wastes, whilst sanitising the filter media or cartridge.

Product Features:

- Cleans oil and grease from filters of all types.
- Removes scale and rust deposits.
- Sanitises filter.

Benefits:

- Improves filtration and circulation to help keep water clear.
- Lengthens life of the filter.
- Reduces maintenance costs.

Product Code	Size
20020118	30 x 250g

Natural Chemistry Pool Perfect™

Natural Chemistry Pool Perfect™ is a natural enzyme product that eliminates scum lines and can be used to assist in the treatment of vandalised pools.

Product Features:

- Patented natural enzyme and botanical extract formula.
- Reduces scum-line build-up.
- Improves water clarity.
- Reduces unpleasant odours.
- Can be added whilst bathers are in the pool.
- Non-toxic and completely biodegradable.
- Classified as a non-dangerous good.

Benefits:

- Enzyme formulation breaks down oils naturally.
- Helps keep pool water crystal clear.
- Reduces filter maintenance.
- Storage and transport friendly.

Product Code	Size
20020117	6 x 2L

*Non-Dangerous Good as classified by The Australian Dangerous Goods code, 7th edition - endorsed by The Australian Transport Council.

Synergy.

The **Synergy™** range of products offer a complete, easy to use pool water management system to prevent algae and bacteria growth. Algae can grow and spread quickly, so prevent it to save you time and money and ensure you have algae-free, sparkling clear water.

Synergy Pool Care System™

The **Synergy Pool Care System™** has been designed to ensure healthy, sparkling, crystal clear water with minimal input from the pool owner. By using the borate technology proven in other BioGuard® products like **Power Chlor®**, **Pacific Blue Power Tabs®** and **Lite®**, the **Synergy Pool Care System™** reduces the incidence of red eyes and itchy skin, whilst softening the water and minimising the risk of scale formation. The **Synergy Pool Care System™** is more convenient than other pool care systems on the market, as it requires no measuring and all the components of the system are packaged in one kit. Less to buy, less to do, more to enjoy!

The **Synergy Pool Care System™** comprises three elements. Once a year, the system has to be boosted with **Synergy Initiator™**. Routine maintenance is then achieved using two products, **Synergy Tabs™** and **Synergy Clear™**.

Note: The **Synergy Pool Care System™** does not include water balancers. Water should be tested and balanced in extreme weather conditions or after excessive usage. It may be necessary to supplement the System with a stand-alone algae preventative like **Back-Up® II** or **AlgiGuard®**.

Also available: **Synergy Test Strips** in 12 packs of 50 strips, Product Code 80006039.

Product Code	Size
20020285 (large)	2 kits
20020291 (medium)	4 kits

Synergy Initiator™

Synergy Initiator™ is a multifunctional granular product that enhances water comfort, increases water clarity, improves the performance of other products and suppresses the growth of algae.

Product Features:

- 1000g/kg boric acid.
- Stable in sunlight and does not evaporate.

Benefits:

- Provides sparkling, silky water.
- Enhances water comfort.
- Increases water clarity.
- Helps stabilise pool water pH.
- Conditions the water to be more comfortable for swimmers.
- Less skin and eye irritation.
- Suppresses the growth of algae.
- Extends equipment life.
- Saves time and money.

Also available: **Synergy Initiator Test Strips** in one pack of 50 strips, Product Code 26121000.

Product Code	Size
20020284	4 x 4kg
20020283	1 x 8kg

Synergy Tabs™

Synergy Tabs™ are a slow-release concentrated chlorine product designed for use in floaters and automatic dispensers.

Product Features:

- 915g/kg trichloroisocyanuric acid.
- 825g/kg available chlorine (Cl).
- Totally soluble 20g tablets.
- Built-in water enhancing agents.

Benefits:

- Can be used in floaters or feeders.
- Ensures sparkling clear pool water.
- Less skin and eye irritation than many chlorinating products.
- Easy to use.

Product Code	Size
20020289	6 x 2kg
20020288	1 x 20kg

Synergy Clear™

Synergy Clear™ is a maintenance shock which comprises a patented blend of oxidising and clarifying agents.

Product Features:

- 600g/kg sodium dichloroisocyanurate.
- 372g/kg available chlorine (Cl).
- pH of 1% solution = 6.7.
- One 250g bag treats a 50,000 litre pool running on the **Synergy Pool Care System™**.
- Dissolves almost instantly and is totally soluble.
- Destroys chloramines and musty odours.
- Clarifying agents aid the filter in removing small suspended particles.
- Classified as a non-dangerous good.

Benefits:

- Easy to use.
- Conditions the water to be more comfortable for swimmers.
- Allows swimmers back into the water faster.
- Makes maintenance a simple weekly process.
- Storage and transport friendly.

Product Code	Size
20020286	3 x 10 bags

Kits.

All maintenance programs make pool care easier for your customers. But BioGuard®'s programs take it one step further. When maintained over 12 months, they can save your customers water, energy and money by keeping their pool water clear and sparkling, along with avoiding common problems. The added benefits of BioGuard® programs make them very easy for you to sell.

3 Step Program Kit™ Fresh Water

The daily program, the **3 Step Program Kit™**, is simple and uncomplicated. Pool owners spend only minutes each week to maintain clear, sparkling water. This kit provides a perfect start up option for a new pool owner.

This is the ideal program for the following types of pools:

- 19,000 litres and above pools.
- In-ground or above-ground pools.
- Good water flow through skimmer.
- Pump circulates 10-12 hours a day.
- All surface types.

The program for freshwater pools consists of:

- Step 1: **Power Chlor®**
- Step 2: **Lite®**
- Step 3: **Back Up® II**

Products sold separately.
