I smell gas in my home even when I am not using the kitchen cook top or oven. What should I do?

You need to get one of our gas technicians to attend and test the appliances and locate the leak and repair as required. A same day response from our gas technician would be required.

7

There is a loss of power throughout my house but my neighbours appear to have power. What should I do?

This could mean a safety switch or circuit has tripped within your switchboard. These could be a few things causing this fault either a faulty appliance is attached, there is some damaged cabling that requires repair. We can have someone attend same day for this fault.
